Subject Index

Abatement and removal
Bioremediation of Hazardous Wastes — A Review, 10
Development of a New Zero-Valent Iron Zeolite Material to Reduce Nitrate without Ammonium Release, 588
Effect of the Composition of Anodic Purging Solutions on Electroosmosis, 664
Enhanced Biological Phosphorus Removal Performance and Microbial Population Changes at High Organic Loading Rates, 701
Evolutionary Multivariate Dynamic Process Model Induction for a Biological Nutrient Removal Process, 718
Numerical Method to Elucidate Likely Target Positions of Chlorine Removal in Anaerobic Sediments Undergoing Polychlorinated Biphenyl Dechlorination, 623
Removal of Model Organic Precursors by Coagulation, 1878
Strategy for Complete Nitrogen Removal in Bioreactor Landfills, 717

Absorption
Electrochemical Desulfurization of Waste Gases in a Batch Reactor, 589
Influence of Sediment Layers on Dynamic Behavior of Aged Concrete Dams, 489
Small-Scale Field Experiment on a Submerged Breakwater for Absorbing Wave Energy, 1814
Test of Chlorides Mixed wtih CaO, MgO, and Sodium Silicate for Dust Control and Soil Stabilization, 1206

Abutments
Behavior of a Stiff Clay behind Embedded Integral Abutments, 790
Predicting Equilibrium Scour-Hole Geometry near Angled Stream Deflectors Using a Three-Dimensional Numerical Flow Model, 964

Acceleration
Biased Modal Estimates from Random Decrement Signatures of Forced Acceleration Responses, 1547

Accident prevention
Evaluation of Flexible Traffic Separators at Highway — Railroad Grade Crossings, 1684
Freeway Accident Likelihood Prediction Using a Panel Data Analysis Approach, 1656

Accidents
Aquatic Assessment of the Chernobyl Nuclear Accident and Its Remediation, 707
Concerns about Methodology Used in Real-World Experiments on Transport and Transport Safety, 1642
Modeling Crossing Behavior and Accident Risk of Pedestrians, 1710
Modeling the Probability of Freeway Rear-End Crash Occurrence, 1640

Accreditation
Certification and Accreditation in Civil Engineering, 1410
Reliability and Validity of FE Exam Scores for Assessment of Individual Competence, Program Accreditation, and College Performance, 1425

Accretion
Intertidal Multiple Sand Bars in a Low-Energy Environment, 1835
Sediment Dynamics in the Meghna Estuary, Bangladesh: A Model Study, 1824

Accuracy
Extension of Preissmann Scheme to Two-Dimensional Flows, 982

Acids
Effect of Mixture Design Parameters and Wetting-Drying Cycles on Resistance of Concrete to Sulfuric Acid Attack, 1225

Acoustic techniques
Acoustic Achievement, 1944
ADCP Measurements of Gravity Currents in the Chicago River, Illinois, 1000
Application of Acoustic Doppler Velocimeters for Streamflow Measurements, 1006
Comparison of Fixed- and Moving-Vessel Flow Measurements with an aDp in a Large River, 994
Correcting Acoustic Doppler Current Profiler Discharge Measurements Biased by Sediment Transport, 997
Damage Evaluation with P-Wave Velocity Measurements during Uniaxial Compression Tests on Argillaceous Rocks, 59
Errors in Acoustic Doppler Profiler Velocity Measurements Caused by Flow Disturbance, 1004
Evaluation of Mean Velocity and Turbulence Measurements with ADCPs, 995
Improved Estimation of ADCP Apparent Bed-Load Velocity Using a Real-Time Kalman Filter, 998
Measuring the Dispersion Coefficient with Acoustic Doppler Current Profilers, 963
Perfect Harmony, 1938
Turbulence Descriptions in Two Cobble-Bed River Reaches, 1001
Validation of Streamflow Measurements Made with Acoustic Doppler Current Profilers, 1005

Activated carbon
Adsorption of Carbon Disulfide (CS_2) in Water by Different Types of Activated Carbon — Equilibrium, Dynamics, and Mathematical Modeling, 625
Modeling As(V) Removal in Iron Oxide Impregnated Activated Carbon Columns, 603
Quaternized Poly(4-Vinylpyridine) Coated Activated Carbon: Diffusion Controlled Sorption of Chromium(VI), 688

Activated carbon treatment
Activated Carbon Addition to a Submerged Anaerobic Membrane Bioreactor: Effect on Performance, Transmembrane Pressure, and Flux, 596

Activated sludge
Energy Audit, Solids Reduction, and Pathogen Inactivation in Secondary Sludges during Batch Thermophilic Aerobic Digestion Process, 647

Isolation, Characterization, and Identification of Bacteria from Activated Sludge and Soluble Microbial Products in Wastewater Treatment Systems, 1898

Kinetics of Phosphorus Release and Uptake in a Membrane-Assisted Biological Phosphorus Removal Process, 695

Replacing Outliers and Missing Values from Activated Sludge Data Using Kohonen Self-Organizing Map, 696

Robust Optimal Design of Activated Sludge Bioreactors, 593

Using the Kinetics of Biological Flocculation and the Limiting Flux Theory for the Preliminary Design of Activated Sludge Systems. I: Model Development, 600

Using the Kinetics of Biological Flocculation and the Limiting Flux Theory for the Preliminary Design of Activated Sludge Systems. II: Experimental Verification, 601

Active control

Tensegrity Active Control: Multiobjective Approach, 272

Adaptive systems

Model Reference Adaptive Control Framework for Real-Time Traffic Management under Emergency Evacuation, 1723

Self-Diagnosis and Self-Repair of an Active Tensegrity Structure, 1602

Adhesives

Low Temperature Binder-Aggregate Adhesion and Mechanistic Characteristics of Polymer Modified Asphalt Mixtures, 1255

Admixtures

Using the Maturity Method in Concrete Produced with Setting Agents, 1275

Adsorption

Adsorption and Abiotic Transformation oif Methyl *tert*-Butyl Ether through Acidic Catalysts, 687

Adsorption and Precoat Filtration Studies of Synthetic Dye Removal by Acid Mine Drainage Sludge, 665

Adsorption of Carbon Disulfide (CS_2) in Water by Different Types of Activated Carbon — Equilibrium, Dynamics, and Mathematical Modeling, 625

Arsenic Removal by a Colloidal Iron Oxide Coated Sand, 694

Bioavailability and Toxicity of Metal Nutrients during Anaerobic Digestion, 591

Chemical-Enhanced Washing for Remediation of Soils Contaminated with Marine Diesel Fuel in the Presence/Absence of Pb, 655

Effect of High Cadmium Loading on Performance of Free Water Surface Constructed Wetlands, 1888

Enhanced Sand Filtration for Storm Water Phosphorus Removal, 648

Irrigation Water Resource Management for Sustainable Agriculture — The Ankobra Basin, Ghana, 1180

On-Site Treatment of Septic Tank Effluent by Using a Soil Adsorption System, 1893

Phosphorus Treatment Capability of Marshland Upwelling System under High Background Salinity Conditions, 712

Simplified Approach for Rapid Estimation of Trichloroethylene Adsorption onto Soils, 1889

Advection

Estimating Transverse Mixing in Open Channels due to Secondary Current-Induced Shear Dispersion, 889

Eulerian — Lagrangian Method for Constituent Transport in Water Distribution Networks, 980

Aeration

Energy Audit, Solids Reduction, and Pathogen Inactivation in Secondary Sludges during Batch Thermophilic Aerobic Digestion Process, 647

Neural Modeling of Square Surface Aerators, 639

Aerobic treatment

Combined Anaerobic/Aerobic Secondary Municipal Wastewater Treatment: Pilot-Plant Demonstration of the UASB/Aerobic Solids Contact System, 637

Electrical Conductivity and Chloride Reduction in Leachate Treatment Systems, 669

Energy Audit, Solids Reduction, and Pathogen Inactivation in Secondary Sludges during Batch Thermophilic Aerobic Digestion Process, 647

Modeling the Aeration Efficiency of a Passively Aerated Vertical-Flow Biological Filter, 702

Strategy for Complete Nitrogen Removal in Bioreactor Landfills, 717

Aerodynamics

Continuum Aeroelastic Model for Inviscid Subsonic Bending-Torsion Wing Flutter, 79

Improved Method for Creating Time-Domain Unsteady Aerodynamic Models, 85

Seismic Vulnerability and Mitigation during Construction of Cable-Stayed Bridges, 149

Structural Stability of Simplified Dynamical System Governing Motion of ALFLEX Reentry Vehicle, 87

Aeroelasticity

Continuum Aeroelastic Model for Inviscid Subsonic Bending-Torsion Wing Flutter, 79

Improved Method for Creating Time-Domain Unsteady Aerodynamic Models, 85

Aerosols

Effects of HVAC System and Building Characteristics on Exposure of Occupants to Short-Duration Point Source Aerosol Releases, 99

Off-Site Exposure to Respirable Aerosols Produced during the Disk-Incorporation of Class B Biosolids, 704

Aerospace engineering

Effect of Surface Properties on Wrinkling of Ultrathin Films, 65

Improved Method for Creating Time-Domain Unsteady Aerodynamic Models, 85

Modeling the Hinge Moment of Skew-Mounted Tape Spring Folds, 73

Nonlinear Oscillations of Vehicle Tires with Hertzian Contact, 69

Sky Watcher, 1935

Soft Computing Algorithm to Data Validation in Aerospace Systems Using Parity Space Approach, 80

Africa

Consideration of Climate Variability and Change in Agricultural Water Resources Planning, 1772

Managing Drought Impacts: Case Study of Mali, Africa, 1774

Wavelet Empirical Orthogonal Functions of Space-Time-Frequency Regimes and Predictability of Southern Africa Summer Rainfall, 1058

Aggregates

Aggregate Effects on Pervious Portland Cement Concrete Static Modulus of Elasticity, 1274

Bayesian Statistical Framework to Construct Probabilistic Models for the Elastic Modulus of Concrete, 1314

Characterization of Aggregate Surface Energy Using the Universal Sorption Device, 1283

Durability of Rubberized Mortar and Concrete, 1227

Effect of Fly Ash Content and Aggregate Gradation on the Durability of Concrete Pavements, 1250

Effect of Mixture Design Parameters and Wetting-Drying Cycles on Resistance of Concrete to Sulfuric Acid Attack, 1225

Effects of Pressure and Aging in SATS Test, 1708

Environmental Effects on Durability of Aggregates Stabilized with Cementitious Materials, 1211

Experimental Methods for the Evaluation of Aggregate Resistance to Polishing, Abrasion, and Breakage, 1323

Gradation Chart for Asphalt Mixes: Development, 1229

Improved Method for Aggregation of Water Quality Subindices, 616

Influence of Fly Ash as Cement Replacement on the Properties of Recycles Aggregate Concrete, 1293

Localized Aggregation of Diverse Energy Sources for Rural Electrification Using Microgrids, 440

Micropore Structure of Aggregates in Treated Soils, 1218

Numerical Simulation of Aggregate Shapes of Two-Dimensional Concrete and Its Application, 81

Screening of Soil Amendments for Efficient Water-Holding Capacity Based on a Rainfall-Infiltration Model in a Vertisol, 1164

Shear Bonding and Thermal Properties of Particle-Filled Polymer Grout for Pipe-in-Pipe Application, 1277

Torsional Capacity of CFRP Strengthened Reinforced Concrete Beams, 213

Aging

Civil Works for Hydroelectric Facilities: Guidelines for Life Extension Upgrade, 1972

Comparative Study of Various Creep and Shrinkage Prediction Models for Concrete, 1237

Effects of Pressure and Aging in SATS Test, 1708

Effects of Rejuvenating Agents on Superpave Mixtures Containing Reclaimed Asphalt Pavement, 1251

Estimation of Electric Transformer Service Life from Oil Degradation Kinetics, 427

HP-GPC Characterization of Rejuvenated Aged CRM Binders, 1269

Small-Strain Nonlinearity of Normally Consolidated Clay, 728

Agricultural wastes

Engineered Struvite Precipitation: Impacts of Component-Ion Molar Ratios and pH, 8

Renewable Energy Generation by Full-Scale Biomass Gasification System Using Agricultural and Forestal Residues, 1890

Agricultural watersheds

Deciding Alternative Land Use Options in a Watershed Using GIS, 1127

Load Modeling Approach for Evaluating Selenium Stream Standards Compliance, 1136

Agriculture

Consideration of Climate Variability and Change in Agricultural Water Resources Planning, 1772

Horizontal-Flow Biofilm System with Step Feed for Nitrogen Removal, 657

Hydrodynamic Forcing of Long-Line Mussel Farms: Observations, 1817

Hydrology and Nitrogen Components of a Simple Rye Growth Model, 1120

Operational Cost Benefits Study of Flexible On-Farm Irrigation Supply Systems, 1110

Optimization and Assessment of Agricultural Water-Sharing Scenarios under Multiple Socioeconomic Objectives, 1771

PnET-II3SL/SWAT: Modeling the Combined Effects of Forests and Agriculture on Water Availability, 1040

Simulation of Intra- or Transboundary Surface-Water-Rights Hierarchies Using the Farm Process for MODFLOW-2000, 1762

Air entrainment

Optimization Study and Damage Evaluation in Concrete Mixtures Exposed to Slow Freeze — Thaw Cycles, 1280

Prediction of Critical Submergence for a Rectangular Intake, 437

Air flow

Effect of Cross-Wire Location on the Mixing of Under-expanded Sonic Jets, 82

Effects of HVAC System and Building Characteristics on Exposure of Occupants to Short-Duration Point Source Aerosol Releases, 99

Large-Eddy Simulations on Indoor/Outdoor Air Quality Relationship in an Isolated Urban Building, 536

Practical Formulas for the Dimensioning of Air Valves, 983

Air pollution

Comparative Fractional Efficiency Predictions by Selected Cyclone Simulation Models, 656

Comprehensive One-Dimensional Mathematical Model for Heat, Gas, and Moisture Transport in Methane Biofilters, 1896

Control Efficiency of Submicron Particles by an Efficient Venturi Scrubber System, 644

Electrochemical Desulfurization of Waste Gases in a Batch Reactor, 589

Large-Eddy Simulations on Indoor/Outdoor Air Quality Relationship in an Isolated Urban Building, 536

Recent Trends of Energy Consumption and Air Pollution in China, 425

Water and Solute Movement in Air Pollution Control Residues Measured by Time-Domain Reflectometry, 678

Air quality

Large-Eddy Simulations on Indoor/Outdoor Air Quality Relationship in an Isolated Urban Building, 536

Prevention Efficiencies of Woven Straw to Reduce PM_{10} Emissions from Exposed Area, 721

Air temperature
Crop Coefficients for Microsprinkler-Irrigated, Clean-Cultivated, Mature Citrus in an Arid Climate, 1114

Air traffic
A More Direct Route, 1964

Air transportation
International Conference on Transportation Engineering 2007, 1986
A More Direct Route, 1964

Airblast
Properties and Dynamic Behavior of Glass Curtain Walls with Split Screw Spline Mullions, 1570
Safe Scaled Distance for Masonry Infilled RC Frame Structures Subjected to Airblast Loads, 1384

Aircraft
Comparing Effectiveness of Measures That Improve Aircraft Structural Safety, 83
Effect of Cross-Wire Location on the Mixing of Underexpanded Sonic Jets, 82
Study of Generation and Collection of Monodisperse Droplets Flows in Microgravity and Vacuum, 75
System for Ranking Relative Threats of U.S. Volcanoes, 1869

Airfields
Aviation: A World of Growth, 1971

Airport design
Aviation: A World of Growth, 1971

Airports
Aviation: A World of Growth, 1971
Logan's Smooth Landing, 1928
Use of Nondestructive Test Deflection Data for Predicting Airport Pavement Performance, 1683

Alabama
Hurricane Katrina Damage Assessment: Louisiana, Alabama, and Mississippi Ports and Coasts, 1984
Influence of Various Material and Traffic Inputs on Flexible Pavement Design Methods for Alabama Roadways, 1690

Alaska
An Uplifting Experience, 1921

Algorithms
Ant Colony Optimization Applied to Water Distribution System Design: Comparative Study of Five Algorithms, 1754
Applying a Recursive Update Algorithm to a Distributed Hydrologic Model, 1042
Calibrating Pipe Wall Demand Coefficient for Chlorine Decay in Water Distribution System, 1780
Calibration and Validation of an Empirical Dissolved Oxygen Model, 673
Calibration and Verification of QUAL2E Using Genetic Algorithm Optimization, 1758
Cluster-Based Hydrologic Prediction Using Genetic Algorithm-Trained Neural Networks, 1011
Constructing a Complex Precast Tilt-Up-Panel Structure Utilizing an Optimization Model, 3D CAD, and Animation, 339
Direct Search Approaches Using Genetic Algorithms for Optimization of Water Reservoir Operating Policies, 1765
Efficient Groundwater Remediation System Design Subject to Uncertainty Using Robust Optimization, 1770
Enhanced, Unconditionally Stable, Explicit Pseudodynamic Algorithm, 503
Evolutionary Algorithm for Performance-Based Shear Wall Placement in Buildings Subjected to Multiple Load Types, 1544
Expanding Finance-Based Scheduling to Devise Overall-Optimized Project Schedules, 326
Fourier-PARMA Models and Their Application to River Flows, 1053
Generating Alternatives Using Evolutionary Algorithms for Water Resources and Environmental Management Problems, 1761
Genetic Algorithm Solution of a Gray Nonlinear Water Environment Management Model Developed for the Liming River in Daqing, China, 624
Groundwater Flow and Contaminant Transport Simulation with Imprecise Parameters, 1116
H_∞ Filtering in Neural Network Training and Pruning with Application to System Identification, 277
Highway Alignment Optimization Incorporating Bridges and Tunnels, 1647
Hydrologic Applications of MRAN Algorithm, 1018
Improving the Performance of Structural Damage Detection Methods Using Advanced Genetic Algorithms, 1474
Minimizing Cutting Wastes of Reinforcement Steel Bars Using Genetic Algorithms and Integer Programming Models, 423
Multiobjective Differential Evolution with Application to Reservoir System Optimization, 285
Multiobjective Planning of Surface Water Resources by Multiobjective Genetic Algorithm with Constrained Differential Dynamic Programming, 1793
New Algorithm for Calculating 3D Available Sight Distance, 1703
Numeric-Analytic Form of the Adomian Decomposition Method for Two-Point Boundary Value Problems in Nonlinear Mechanics, 561
Optimizing Rail Transit Routes with Genetic Algorithms and Geographic Information System, 1735
Parallel Genetic Algorithms for Optimizing Resource Utilization in Large-Scale Construction Projects, 12
Probabilistic Performance-Based Optimal Design of Steel Moment-Resisting Frames. I: Formulation, 1504
Probabilistic Performance-Based Optimal Design of Steel Moment-Resisting Frames. II: Applications, 1505
Proposed Shear Design Equations for FRP-Reinforced Concrete Beams Based on Genetic Algorithms Approach, 1329
Simultaneous Determination of Critical Slip Surface and Reliability Index for Slopes, 804
Simultaneous Inverse Identification of Transient Thermal Properties and Heat Sources Using Sparse Sensor Information, 582
Soft Computing Algorithm to Data Validation in Aerospace Systems Using Parity Space Approach, 80
Streamflow Forecasting Using Different Artificial Neural Network Algorithms, 1060
Two Radar Interferometric Approaches to Monitor Slow and Fast Land Deformation, 1622
Using Elitist Particle Swarm Optimization to Facilitate Bicriterion Time-Cost Trade-Off Analysis, 371

Using Time-Delay Neural Network Combined with Genetic Algorithms to Predict Runoff Level of Linshan Watershed, Sichuan, China, 1031

Wavelet Empirical Orthogonal Functions of Space-Time-Frequency Regimes and Predictability of Southern Africa Summer Rainfall, 1058

Alignment

Conceptual Model of Partnering and Alliancing, 342

Highway Alignment Optimization Incorporating Bridges and Tunnels, 1647

How Modern Headlamp Performance Impacts Sag Vertical Curve Design, 1664

Simulation of Shield Tunneling Behavior along a Curved Alignment in a Multilayered Ground, 787

Use of Satellite Imagery for Establishing Road Horizontal Alignments, 1617

Alkalinity

Long-Term Compression Performance of a Pultruded GFRP Element Exposed to Concrete Pore Water Solution, 249

Allocations

Mathematical Programming Approaches for Modeling Water Rights Allocation, 1750

Allowable stress design

Safety Evaluation of Low-Rise Steel Structures under Wind Loads by Nonlinear Database-Assisted Technique, 1487

Alluvial fans

Consideration for Unsaturated Flow beneath a Streambed during Alluvial Well Depletion, 1020

Aluminum

Application of Biocoagulant on Drinking Water Treatement, 1881

Evaluation of Newly Developed Aluminum, Lime, and Fly Ash Technology for Solidifaction/Stabilization of Mine Tailings, 1219

Rehabilitation of Cracked Aluminum Connections with GFRP Composites for Fatigue Stresses, 237

Ammonia

Engineered Struvite Precipitation: Impacts of Component-Ion Molar Ratios and pH, 8

Anaerobic treatment

Bioavailability and Toxicity of Metal Nutrients during Anaerobic Digestion, 591

Biohydrogen Production by Mesophilic Anaerobic Fermentation of Glucose in the Presence of Linoleic Acid, 720

Combined Anaerobic/Aerobic Secondary Municipal Wastewater Treatment: Pilot-Plant Demonstration of the UASB/Aerobic Solids Contact System, 637

Enhanced Start-Up of Upflow Anaerobic Filters by Pulsation, 611

Evaluation of Input Variables in Adaptive-Network-Based Fuzzy Inference System Modeling for an Anaerobic Wastewater Treatment Plant under Unsteady State, 680

Nitrogen Removal in Recirculating Sand Filter Systems with Upflow Anaerobic Components, 645

Analysis

Three-Dimensional Asymmetrical Slope Stability Analysis Extension of Bishop's, Janbu's, and Morgenstern — Price's Techniques, 862

Upper-Bound Solutions for Rigid-Plastic Plates and Slabs on Elastic Foundation by the Principle of Stationary Total Energy, 1461

Analytical techniques

Analysis of Point-Source and Boundary-Source Solutions of One-Dimensional Groundwater Transport Equation, 709

Analytical Modeling of Three-Layered HMA Mixtures, 28

Analytical Relationships for Designing Multiple Outlets Pipelines, 1125

Analytical Solutions for Elevated-Temperature Behavior of Composite Beams with Partial Interaction, 1507

Eulerian — Lagrangian Method for Constituent Transport in Water Distribution Networks, 980

Explicit Infiltration Function for Furrows, 1147

Flow through Trapezoidal and Rectangular Channels with Rigid Cylinders, 918

Seismic Response of Interior RC Beam-Column Joints Upgraded with FRP Sheets. II: Analysis and Parametric Study, 264

Semianalytical Model for Drawdown due to Pumping a Partially Penetrating Large Diameter Well, 1126

Undrained Limit States of Shallow Foundations Acting in Consort, 34

Anchorages

Analytical Modeling of the Pre- and Postyield Behavior of Bond in Reinforced Concrete, 1565

Bond Behavior of CFRP Bars in Simply Supported Reinforced Concrete Beam with Hanging Region, 219

Bond Durability of Glass Fiber-Reinforced Polymer Bars Embedded in Concrete Beams, 231

High-Bond Bars in NSC and HPC: Study on Size Effect and on the Local Bond Stress-Slip Law, 1453

Prediction of Interfacial Bond Failure of FRP — Concrete Surface, 248

Use of FEA for Design of Posttensioning Anchor Head, 133

Anchors

Experimental and Numerical Study of Uplift Behavior of Shallow Circular Anchor in Two-Layered Sand, 767

Novel Anchor System for CFRP Rod: Finite-Element and Mathematical Models, 252

Pullout Behavior of Granular Pile-Anchors in Expansive Clay Beds In Situ, 773

Animals

Phosphorus Co-Precipitation in the Biological Treatment of Slaughterhouse Wastewater in a Sequencing Batch Reactor, 14

Anisotropy

Anisotropy-Based Failure Criterion for Interphase Systems, 779

Characterization of Asphalt Mix Response under Repeated Loading Using Anisotropic Nonlinear Viscoelastic-Viscoplastic Model, 1316

Determination of Shear-Wave Velocities and Shear Moduli of Completely Decomposed Tuff, 782

Development of an Elastoviscoplastic Microstructural-Based Continuum Model to Predict Permanent Deformation in Hot Mix Asphalt, 26

Distortional Buckling of Cold-Formed Stainless Steel Sections: Experimental Investigation, 4

Distortional Buckling of Cold-Formed Stainless Steel Sections: Finite-Element Modeling and Design, 5
Effect of Gradation on Nonlinear Stress-Dependent Behavior of a Sandy Flexible Pavement Subgrade, 1704
Free-Edge and Ply Cracking Effect in Angle-Ply Laminated Composites Subjected to In-Plane Loads, 576
Immiscible Displacement Model for Anisotropic and Correlated Porous Media, 45
Lateral Force Induced by Rectangular Surcharge Loads on a Cross-Anisotropic Backfill, 838
Modeling Cross Anisotropy in Granular Materials, 539
Numerical Study of Impact of Soil Anisotropy on Seismic Performance of Retaining Structure, 53
Operation and Performance of Horizontal Wells for Leachate Control in a Waste Landfill, 817
Response of an Anisotropic Rock Mass under Polyaxial Stress State, 1253
Stress Path Testing of an Anisotropic Sandstone, 733
Theory of Seepage into an Auger Hole in a Confined Aquifer Overlying a Gravel Substratum, 1150

Approximation methods

Assessment of Improved Nonlinear Static Procedures in FEMA-440, 1553
Efficient Dynamic Reanalysis of Structures, 1473
Project Delivery System Selection under Uncertainty: Multicriteria Multilevel Decision Aid Model, 1203

Aprons

Effect of Upward Seepage on Scour and Flow Downstream of an Apron due to Submerged Jets, 876

Aquatic habitats

Application of Several Depth-Averaged Turbulence Models to Simulate Flow in Vertical Slot Fishways, 887
Aquatic Assessment of the Chernobyl Nuclear Accident and Its Remediation, 707
Predicting Interfacial Diffusion Coefficients for Fluxes across the Sediment-Water Interface, 897
Uptake of Haolgenated Phenols by Aquatic Plants, 700

Aquifers

Artificial Neural Networks Approximation of Density Dependent Saltwater Intrusion Process in Coastal Aquifers, 1036
Design of a Passive Biobarrier System for Chromium Containment in Confined Aquifers, 1895
Estimating Storage Coefficient and Transmissivity from Slug Test Data, 1169
Experimental and Modeling Study of the Soil-Atmosphere Interaction and Unsaturated Water Flow to Estimate the Recharge of a Phreatic Aquifer, 1064
Flow to a Well in a Two-Aquifer System, 1021
Modeling Laboratory Observations on Stream-Aquifer Interaction, 1118
New Methods for Aquifer Parameters from Slug Test Data, 1141
Optimizing Aquifer Parameters from Drawdowns in Large Diameter Wells, 1158
Postaudit Study of DBCP and EDB Contamination in the Pearl Harbor Aquifer, 1062
Potential for 17β-Estradiol and Estrone Degradation in a Recharge Aquifer System, 686
Remediation of TCE-Contaminated Groundwater in a Sandy Aquifer Using Pulsed Air Sparging: Laboratory and Numerical Studies, 635
Semianalytical Time Integration for Transient Groundwater Flow in Confined Aquifers, 1013
Simple Approximation of Well Function for Constant Drawdown Variable Discharge Artesian Wells, 1144
Simple Equations for Aquifer Parameters from Drawdowns in Large-Diameter Wells, 1143
Simulation of Processes Involved in Soil Salinization to Guide Soil Remediation, 1124
Theory of Seepage into an Auger Hole in a Confined Aquifer Overlying a Gravel Substratum, 1150
Tomographic Approach to Identify Transmissivity with Differential System Method, 1068
Uncertainty Analysis of Linear and Nonlinear Groundwater Flow in a Heterogeneous Aquifer, 1039
World Environmental and Water Resources Congress 2007, 2007

Arbitration

Insight into Resolving Construction Disputes by Mediation/Adjudication in Hong Kong, 1406

Arches

In-Plane Stability of Parabolic Arches with Horizontal Spring Supports. I: Theory, 1541
In-Plane Stability of Parabolic Arches with Horizontal Spring Supports. II: Experiments, 1542
Rotational Spring Analogy for Buckling Analysis, 1503
Strengthening Masonry Arches with Composite Materials, 209
Tanaro Bridge: Dynamic Tests on a Couple of Spans, 182

Architects

Reconsidering Value Engineering: The Rhode Island School of Design Library Project, 1923

Architecture

Component-Based Framework for Implementing Integrated Architectural/Engineering/Construction Project Systems, 306
Design and Construction Challenges of a Federal Laboratory Building: A Case Study, 111
Development and Evaluation of a Vehicle-Infrastructure Integration Simulation Architecture, 305

Arctic regions

Perpetuating a Pier, 1937
Total Coliform Survival Characteristics in Frozen Soils, 715

Argentina

Comparison of Fixed- and Moving-Vessel Flow Measurements with an aDp in a Large River, 994

Arid lands

Crop Coefficients for Microsprinkler-Irrigated, Clean-Cultivated, Mature Citrus in an Arid Climate, 1114
Determination of Flash Floods in Western Arabian Peninsula, 1073

Arsenic

Arsenic Removal by a Colloidal Iron Oxide Coated Sand, 694
Arsenite Oxidation by *Alcaligenes Faecalis* Strain O1201 in a Continuous-Flow Bioreactor, 646
GIS Approach of Delineation and Risk Assessment of Areas Affected by Arsenic Pollution in Drinking Water, 677

Isolation and Characterization of NP4, Arsenate-Reducing *Sulfurospirillum*, from Maine Groundwater, 597

Modeling As(V) Removal in Iron Oxide Impregnated Activated Carbon Columns, 603

Special Section: The Arsenic Crisis — Clean Drinking Water for All, 1933

Special Section: The Arsenic Crisis — Removing Arsenic Sustainably, 1932

Artificial intelligence

Application of Support Vector Machines in Assessing Conceptual Cost Estimates, 296

Developing Complete Conditional Probability Tables from Fractional Data for Bayesian Belief Networks, 297

Dynamic Prediction of Project Success Using Artificial Intelligence, 352

G-EMME/2: Automatic Calibration Tool of the EMME/2 Transit Assignment Using Genetic Algorithms, 1700

Hybrid Soft Computing Approach for Mining of Complex Construction Databases, 313

Stochastic Fuzzy Neural Network: Case Study of Optimal Reservoir Operation, 1794

Utility of LANDSAT-Derived Land Use Data for Estimating Storm-Water Pollutant Loads in an Urbanizing Area, 614

Artificial recharge

Analysis of Seepage from Polygon Channels, 914

Groundwater Mound due to Constant Recharge from a Strip Basin, 1032

ASCE

ASCE Official Register 2007, 1970

ASCE Activities

The Vision for Civil Engineering in 2025, 1949

ASCE Committees

Preparing the Civil Engineer of Tomorrow by "Raising the Bar", 1952

ASCE Presidents

Levee Leader, 1931

ASCE Publications

Evolution of a Journal, 383

A Journal Matures, 384

Preparing the Civil Engineer of Tomorrow by "Raising the Bar", 1952

Transactions of the American Society of Civil Engineers 2006, 2004

Ashes

Effects of Nano-SiO_2 on Tiles Manufactured with Clay and Incinerated Sewage Sludge Ash, 1303

Strength and Slake Durability of Lime Stabilized Pond Ash, 1279

Asia

Distributed Entrainment Sink Approach for Modeling Mixing and Transport in the Intermediate Field, 945

Effects of the 2004 Great Sumatra Tsunami: Southeast Indian Coast, 1839

Runup and Inundation along the Indian Peninsula, Including the Andaman Islands, due to Great Indian Ocean Tsunami, 1840

Simulation of Processes Involved in Soil Salinization to Guide Soil Remediation, 1124

Strategic Decision Support for Resolving Conflict over Water Sharing among Countries along the Syr Darya River in the Aral Sea Basin, 1773

Asphalt pavements

Analysis of Asphalt Pavement Materials and Systems: Engineering Methods, 1968

Applicability of the International Roughness Index as a Predictor of Asphalt Pavement Condition, 1718

Dynamic Prediction Model of As-Built Roughness in Asphaltic Concrete Pavement Construction, 1649

Effectiveness of Microsurfacing Treatments, 1672

Effects of Rejuvenating Agents on Superpave Mixtures Containing Reclaimed Asphalt Pavement, 1251

Field Trial for Asphalt Pavements Reinforced with Geowynthetics and Behavior of Glass-Fiber Grids, 1377

HP-GPC Characterization of Rejuvenated Aged CRM Binders, 1269

Influence of Various Material and Traffic Inputs on Flexible Pavement Design Methods for Alabama Roadways, 1690

Material Properties of Coal-Tar Emulsion Sealers, 1243

Practical Methodology of Determining the In Situ Dynamic (Complex) Moduli for Engineering Analysis, 1268

Preliminary Constituent Proportioning for Central Plant Hotmix ASphalt Recycling, 1296

Rutting Resistance of Rubberized Asphalt Concrete Pavements Containing Reclaimed Asphalt Pavement Mixtures, 1264

Simplified Solution for Periodic Thermal Discontinuities in Asphalt Overlays Bonded to Rigid Pavements, 1643

Solid Waste Generation in Asphalt and Reinforced Concrete Roadway Life Cycles, 1084

Using a New Zealand Performance Specification to Evaluate U.S. Chip Seal Performance, 1716

Validation of New Mix Design Procedure for Cold In-Place Recycling with Foamed Asphalt, 1326

Asphalts

Advanced Testing and Characterization of Asphalt Concrete Materials in Tension, 30

Air Void Models for the Dynamic Modulus, Fatigue Cracking, and Rutting of Asphalt Concrete, 1311

Analytical Modeling of Three-Layered HMA Mixtures, 28

Behavior of Asphalt Concrete Mixtures with Reclaimed Polyethylene as Additive, 1267

Characterization of Asphalt Mix Response under Repeated Loading Using Anisotropic Nonlinear Viscoelastic-Viscoplastic Model, 1316

Computational Constitutive Model for Predicting Nonlinear Viscoelastic Damage and Fracture Failure of Asphalt Concrete Mixtures, 24

Damage Based Model for Prediction of Asphalt Concrete Fatigue Curves, 1291

Destruction and Recovery of Internal Structure in Polymer-Modified Asphalts, 1234

Development of an Elastoviscoplastic Microstructural-Based Continuum Model to Predict Permanent Deformation in Hot Mix Asphalt, 26

Dynamic Effects on Moisture Transport in Asphalt Concrete, 1685

Effect of Testing Geometry on Measuring Fatigue of Asphalt Binders and Mastics, 1297

Effects of Pressure and Aging in SATS Test, 1708

Evaluation and Modeling of Repeated Load Test Data of Asphalt Concrete for Mechanistic-Empirical Pavement Design, 1325

Gradation Chart for Asphalt Mixes: Development, 1229

Indirect Tension Relaxation Test to Evaluate the Effect of the Addition of RAP to HMA Mixes, 1233

Influence of Air Void Distribution on the Moisture Susceptibility of Asphalt Mixes, 1286

Laboratory Study of the Effects of Compaction on the Volumetric and Rutting Properties of CRM Asphalt Mixtures, 1334

Leaching of Heavy Metals Stabilized in Asphalt Matrix, 1883

Low Temperature Binder-Aggregate Adhesion and Mechanistic Characteristics of Polymer Modified Asphalt Mixtures, 1255

Micromechanical Modeling of the Viscoelastic Behavior of Asphalt Mixtures Using the Discrete-Element Method, 27

Prediction of Creep Stiffness of Asphalt Mixture with Micromechanical Finite-Element and Discrete-Element Models, 466

Preliminary Constituent Proportioning for Central Plant Hotmix ASphalt Recycling, 1296

Proposed Method to Determine the Flow Number in Bituminous Mixtures from Repeated Axial Load Tests, 1707

Spherical Indentation Behavior of Asphalt Mixtures, 1298

Viscoelastoplastic Damage Characterization of Asphalt—Aggregate Mixtures Using Digital Image Correlation, 25

Assessments

Application of Support Vector Machines in Assessing Conceptual Cost Estimates, 296

Assessment and Repair of Fire-Damaged High-Strength Concrete: Strength and Durability, 1262

Assessment of In-Place Wood Floor Systems, 93

Assessment of Low-Cost GPS Receiver Accuracy and Precision in Forest Environments, 1634

Construction Planning Method Using Case-Based Reasoning (CONPLA-CBR), 303

Field Assessment of Alternative Bed-Load Transport Estimators, 996

GIS Approach of Delineation and Risk Assessment of Areas Affected by Arsenic Pollution in Drinking Water, 677

Inventory and Assessment of Denver, Colorado: Curb and Gutters, 1364

Knowledge-Based Condition Survey Inspection Concepts, 1083

Performance of Storage Tanks in Oil Facilities Damaged by Hurricanes Katrina and Rita, 1386

Probabilistic Assessment of Stress Normalization for CPT Data, 805

Reliability and Validity of FE Exam Scores for Assessment of Individual Competence, Program Accreditation, and College Performance, 1425

Vulnerability Assessment of Reinforced Concrete Moment Resisting Frame Bulidings, 1486

Water Quality Index: A Fuzzy River-Pollution Decision Support Expert System, 1755

Assets

Performance Indicators and Multicriteria Decision Support for Sewer Asset Management, 1086

Attenuation

Chaotic Advection and Enhanced Groundwater Remediation, 1215

Australia

Building Constructive Innovation Networks: Role of Relationship Management, 357

Evaluation of the Effectiveness of Strengthening Intervention by CFRP on MRWA Bridge No. 3014, 241

Forecasting Residential Water Demand: Case Study, 1775

Generalized Shallow Water Wave Growth from Lake George, 1815

Hydraulic Performances of Minimum Energy Loss Culverts in Australia, 1366

Liquidated Damages: A Comparative Study of the Law in England, Australia, New Zealand, and Singapore, 1414

Quantifying Rainfall and Flooding Impacts on Groundwater Levels in Irrigation Areas: GIS Approach, 1153

Response of Beams to Shock Loading: Inelastic Range, 482

Simulation of Processes Involved in Soil Salinization to Guide Soil Remediation, 1124

Automatic identification systems

Tracking Components and Maintenance History within a Facility Utilizing Radio Frequency Identification Technology, 273

Automation

Algorithms for Automated Monitoring and Control of Fall Hazards, 274

Analytic-Element Modeling of Supraregional Groundwater Flow: Concepts and Tools for Automated Model Configuration, 1014

Automatic Tuning of PI Controllers for an Irrigation Canal Pool, 1112

Comparison of Technology Utilization and Benefits in Taiwanese and U.S. Industries, 1197

Knowledge-Based Standard Progress Measurement for Integrated Cost and Schedule Performance Control, 320

Supply- and Output-Side Extensions to the Inoperability Input-Output Model for Interdependent Infrastructures, 1105

Technology Development Decision Economics for Real-Time Rolling Resistance Monitoring of Haul Roads, 360

Using Hue, Saturation, and Value Color Space for Hydraulic Excavator Idle Time Analysis, 294

Auto-regressive models

Estimating Rain Derived Inflow and Infiltration for Rainfalls of Varying Characteristics, 880

Auto-regressive moving-average model

Bayesian Time-Series Model for Short-Term Traffic Flow Forecasting, 1659

Avalanches

Cellular-Automata Model for Dense-Snow Avalanches, 205

Awards
It's All about People: Stemming the Pending Shortfall of New Engineers, 1851

Axial compression
Axial Compression Capacity of Welded-Slip Pipeline Joints, 1676
Compression Tests of Circular Timber Column Confined with Carbon Fibers Using Inorganic Matrix, 1230
Confinement Model of Concrete with Externally Bonded FRP Jackets or Posttensioned FRP Shells, 1558
Finite-Element Modeling of Partially Encased Composite Columns Using the Dynamic Explicit Method, 1462
Global and Local Buckling of a Sandwich Beam, 473
Structural Upgrading of Masonry Columns by Using Composite Reinforcements, 270

Axial loads
Behavior of Rigid Footings on Gravel under Axial Load and Moment, 833
Benefits of Using Puddled HSC with Fibers in Slabs to Transmit HSC Column Loads, 1611
Design Expression for the In-Plane Shear Strength of Reinforced Concrete Masonry, 1499
Modeling of Prestressed Concrete-Filled Circular Composite Tubes Subjected to Bending and Axial Loads, 13
Proposed Method to Determine the Flow Number in Bituminous Mixtures from Repeated Axial Load Tests, 1707

Axial strain
Confinement Model of Concrete with Externally Bonded FRP Jackets or Posttensioned FRP Shells, 1558

Axisymmetry
Axisymmetric Deformation of a Pressurized Thin Elastic Membrane with Nonuniform Thickness, 563
General Axisymmetric Active Earth Pressure by Method of Characteristics — Theory and Numerical Formulation, 15

Backfills
Failure Analysis of a Bridge Embankment with Cracked Approach Slabs and Leaking Sand, 1379
Lateral Force Induced by Rectangular Surcharge Loads on a Cross-Anisotropic Backfill, 838
Numerical Model for Analyzing Slug Tests in Vertical Cutoff Walls, 837
Numerical Modeling of Cemented Mine Backfill Deposition, 842
Peaking Deflections of Flexible Pipe during Initial Backfilling Process, 1651
Soil-Structure Interaction and Imperfect Trench Installations for Deeply Buried Concrete Pipes, 750
"Underlying" Causes for Settlement of Bridge Approach Pavement Systems, 1367

Backwater
Variable Parameter Muskingum Routing Considering Downstream Effects, 989

Bacteria
Arsenite Oxidation by *Alcaligenes Faecalis* Strain 01201 in a Continuous-Flow Bioreactor, 646
Fluid Dynamics Impact on Bacterial Physiology: Biochemical Oxygen Demand, 617
Isolation and Characterization of NP4, Arsenate-Reducing *Sulfurospirillum*, from Maine Groundwater, 597
Isolation, Characterization, and Identification of Bacteria from Activated Sludge and Soluble Microbial Products in Wastewater Treatment Systems, 1898
PhillyRiverCast: A Real-Time Bacteria Forecasting Model and Web Application for the Schuylkill River, 1797
Spatial Variation of Sediment Sulfate Reduction Rates in a Saline Lake, 716
Total Coliform Survival Characteristics in Frozen Soils, 715
Use of Recombinant Bioluminescent Bacteria for On-Site Monitoring of Toluene Analogs at Petroleum Contaminated Sites, 681

Ballast
Cyclic Filtration Apparatus for Testing Subballast under Rail Track, 756

Banding
Computational Techniques and Shear Band Development for Cylindrical and Spherical Penetrometers in Strain-Softening Clay, 42

Bangladesh
Evaluation of Risk-Related Performance in Water Management for the Ganges Delta of Bangladesh, 1763

Bank erosion
Coupling Bank Stability and Bed Deformation Models to Predict Equilibrium Bed Topography in River Bends, 981
Stream Bank Erosion: In Situ Flume Tests, 1139

Barriers
Analytical and Numerical Modeling Assessment of Capillary Barrier Performance Degradation due to Contaminant-Induced Surface Tension Reduction, 746
Chloride Transport through Cement-Bentonite Barriers, 738
Deck-Mounted Steel Post Barrier System, 159
Development of a New Zero-Valent Iron Zeolite Material to Reduce Nitrate without Ammonium Release, 588
Field Monitoring of a Permeable Reactive Barrier for Removal of Chlorinated Organics, 9
Modeling and Simulation of Collisons of Heavy Trucks with Concrete Barriers, 1691
Preferential Flow in a Reclamation Cover: Hydrological and Geochemical Response, 839
Probabilistic Unsaturated Flow along the Textural Interface in Three Capillary Barrier Models, 708
Tropical Soils — Acid Mine Drainage Interactions: Breakthrough Curves and Some Transport Parameters, 676

Bars
Manual Bar Bending — An Occupational Hazard for Construction Workers in Developing Nations, 404
Minimizing Cutting Wastes of Reinforcement Steel Bars Using Genetic Algorithms and Integer Programming Models, 423

Base course
Effect of Gravel Size, Type, and Mold Size on the Carrying Capacity of Calcareous Fines-Gravel Mixes, 1307

Field Testing Sections with Stabilized Blended Calcium Sulfate as Base Courses, 1246

Base flow

Closer Look at the Baseflow Correlation Method, 1025

Base isolation

Tilting Analysis of Rectangular Elastic Layers Bonded between Rigid Plates, 550

Bathymetry

Evaluation of an Experimental LiDAR for Surveying a Shallow, Braided, Sand-Bedded River, 949

Bayesian analysis

Bayesian Statistical Framework to Construct Probabilistic Models for the Elastic Modulus of Concrete, 1314

Bayesian Time-Series Model for Short-Term Traffic Flow Forecasting, 1659

Calibration of Water Distribution Hydraulic Models Using a Bayesian-Type Procedure, 957

Closed-Form Fragility Estimates, Parameter Sensitivity, and Bayesian Updating for RC Columns, 530

Comparative Probabilistic Initial Bridge Load Rating Model, 194

Developing Complete Conditional Probability Tables from Fractional Data for Bayesian Belief Networks, 297

Markov Chain Monte Carlo-Based Method for Flaw Detection in Beams, 575

Model Selection in Applied Science and Engineering: A Decision-Theoretic Approach, 526

Random Composites Characterization Using a Classifier Model, 463

Transitional Markov Chain Monte Carlo Method for Bayesian Model Updating, Model Class Selection, and Model Averaging, 529

Bays

Management of Fluid Mud in Estuaries, Bays, and Lakes. I: Present State of Understanding on Character and Behavior, 872

Management of Fluid Mud in Estuaries, Bays, and Lakes. II: Measurement, Modeling, and Management, 873

Beach erosion

Temporal and Spatial Change in Equilibrium Beach Profiles from the Florida Panhandle, 1837

Beaches

Coastal Sediments '07, 1973

Equilibrium Beach Profile Concept for Delaware Beaches, 1813

Geometric Study of Monochromatic Wave Breaking on Beaches, 1834

Intertidal Multiple Sand Bars in a Low-Energy Environment, 1835

Irregular Wave Seepage and Overtopping of Permeable Slopes, 1823

Longshore Current and Sediment Transport on Beaches, 1829

Temporal and Spatial Change in Equilibrium Beach Profiles from the Florida Panhandle, 1837

Tracer Studies in a Laboratory Beach Subjected to Waves, 675

Beam columns

Analytical Sensitivity of Plastic Rotations in Beam-Column Elements, 1563

Combined Continua and Lumped Parameter Modeling for Nonlinear Response of Structural Frames to Impulsive Ground Shock, 572

Design for Shear of Prestressed Concrete Beam-Column Joint Cores, 1581

Direct Damage-Controlled Design of Concrete Structures, 1451

Dynamic Modal Analysis and Stability of Cantilever Shear Buildings: Importance of Moment Equilibrium, 522

Evaluation, Calibration, and Verification of a Reinforced Concrete Beam — Column Joint Model, 1441

Large-Deflection Stability of Slender Beam-Columns with Both Ends Partially Restrained against Rotation, 587

Performance-Based Seismic Retrofit Strategy for Existing Reinforced Concrete Frame Systems Using Fiber-Reinforced Polymer Composites, 227

Response Gradients for Nonlinear Beam-Column Elements under Large Displacements, 1446

Rotational Spring Analogy for Buckling Analysis, 1503

Seismic Response of Interior RC Beam-Column Joints Upgraded with FRP Sheets. I: Experimental Study, 263

Seismic Response of Interior RC Beam-Column Joints Upgraded with FRP Sheets. II: Analysis and Parametric Study, 264

Beams

Analysis of Scaling and Instability in FRP-Concrete Shear Debonding for Beam-Strengthening Applications, 455

Analytical Method for Evaluating Ultimate Torque of FRP Strengthened Reinforced Concrete Beams, 243

Analytical Model for Geometric and Material Nonlinear Analysis of Externally Prestressed Beams, 461

Analytical Solution of Two-Layer Beam Taking into Account Interlayer Slip and Shear Deformation, 1516

Asymptotic Derivation of Shear Beam Theory from Timoshenko Theory, 542

Beam Finite-Element Analysis of Pressurized Fabric Tubes, 1527

Behavior and Failure Strength of Laminated Glass Beams, 578

Behavior of CFRP Strengthened Reinforced Concrete Beams in Corrosive Environment, 233

Behavior of FRP Strengthened Reinforced Concrete Beams under Torsion, 225

Behavior of Girder-Floor Beam Connections in Prestressed Concrete Pedestrian Bridges Subjected to Lateral Impact Loads, 1595

Behavior of Steel Beam to Concrete-Filled Steel Tubular Column Connections after Exposure to Fire, 1508

Correction Factors in Series Solutions for One- and Two-Dimensional Boundary Value Problems, 564

Dynamic Analysis of Eccentrically Prestressed Damped Beam under Moving Harmonic Force Using Higher Order Shear Deformation Theory, 1600

Dynamic and Static Behavior of a Curved-Girder Bridge with Varying Boundary Conditions, 1357

Dynamic Modal Analysis and Stability of Cantilever Shear Buildings: Importance of Moment Equilibrium, 522

Effect of Supplemental Viscous Damping on the Seismic Response of Struct. Systems with Metallic Dampers, 1572

Fatigue and Overloading Behavior of Steel — Concrete Composite Flexural Members Strengthened with High Modulus CFRP Materials, 271
Global and Local Buckling of a Sandwich Beam, 473
Identification of Concentrated Damages in Euler-Bernoulli Beams under Static Loads, 541
Nonprismatic Beam Element for Beams with RBS Connections in Steel Moment Frames, 1448
Peak Response of a Nonlinear Beam, 543
Performance Evaluation of Precast Posttensioned Concrete Multibeam Deck, 1378
Plastic Rotation of an RCC T-Beam Bridge Girder under the Combined Influence of Flexure and Torsion, 114
Response of Beams to Shock Loading: Inelastic Range, 482
Testing and Analysis of Aluconcrete Beams, 1270
Upper-Bound Solutions for Rigid-Plastic Beams and Plates of Large Deflections by Variation Principles, 459
Vibration of Tensioned Beams with Intermediate Damper. I: Formulation, Influence of Damper Location, 487

Bearing capacity

Bearing Capacity in Long-Span Tubular Truss Chords, 1465
Centrifuge Modeling of Torsionally Loaded Pile Groups, 847
Crack Condition Evaluation Approach for the Deteriorated Girder of an RC Bridge, 181
Effect of Footing Roughness on Bearing Capacity Factor N_γ, 770
Effect of Gravel Size, Type, and Mold Size on the Carrying Capacity of Calcareous Fines-Gravel Mixes, 1307
Effect of Openings on Oriented Strand Board Webbed Wood I-Joists, 1445
Evaluation of Laminated Circular Elastomeric Bearings, 122
Force-Deformation Behavior of Isolation Bearings, 168
Load-Carrying Capacity of Timber — Concrete Joints with Dowel-Type Fasteners, 1501
Scale Effects of Shallow Foundation Bearing Capacity on Granular Material, 832
Settlement Ratio of Pile Groups in Sandy Soils from Field Load Tests, 818
Spread Footings in Sand: Load Settlement Curve Approach, 806
Stress Transfer between FRP Laminates and Concrete through Deteriorated Concrete Surface, 246
Support Mechanisms of Rammed Aggregate Piers. I: Experimental Results, 858
Tanaro Bridge: Dynamic Tests on a Couple of Spans, 182
Test and Analysis for Ultimate Load-Carrying Capacity of Existing Reinforced Concrete Arch Ribs, 112
Ultimate Bearing Capacity of Two Interfering Rough Strip Footings, 20
Undrained Limit States of Shallow Foundations Acting in Consort, 34

Bearings

Implications of Design Assumptions on Capacity Estimates and Demand Predictions of Multispan Curved Bridges, 187

Bed load

Critical Shear Stress of Bimodal Sediment in Sand-Gravel Rivers, 921
Deconvolution Technique to Separate Signal from Noise in Gravel Bedload Velocity Data, 950
Effect of Coarse Surface Layer on Bed-Load Transport, 984
Erosion of Cohesive Sediments: Resuspension, Bed Load, and Erosion Patterns from Field Experiments, 917
Field Assessment of Alternative Bed-Load Transport Estimators, 996
Improved Estimation of ADCP Apparent Bed-Load Velocity Using a Real-Time Kalman Filter, 998
Machine Learning Approach to Modeling Sediment Transport, 913
One-Dimensional Modeling of Dam-Break Flow over Movable Beds, 875
Simulating Bed-Load Transport in a Complex Gravel-Bed River, 902
Unified View of Sediment Transport by Currents and Waves. I: Initiation of Motion, Bed Roughness, and Bed-Load Transport, 932
Unified View of Sediment Transport by Currents and Waves. III: Graded Beds, 942

Bed materials

Effect of Coarse Surface Layer on Bed-Load Transport, 984
Influence of Sediment Gradation on Scour Downstream of Block Ramps, 988

Bed roughness

Hydraulic Jumps on Rough Beds, 965
Numerical Simulation of Flow over a Rough Bed, 909
Spatially Averaged Turbulent Flow over Square Ribs, 469
Unified View of Sediment Transport by Currents and Waves. I: Initiation of Motion, Bed Roughness, and Bed-Load Transport, 932

Bedforms

ADV Measurements around a Cluster Microform in a Shallow Mountain Stream, 1002
Density Functions for Entrainment and Deposition Rates of Uniform Sediment, 956
Field Assessment of Alternative Bed-Load Transport Estimators, 996
Flow Heterogeneity over 3D Cluster Microform: Laboratory and Numerical Investigation, 898
Flow Measurement Using Flying ADV Probes, 999
Riprap Size Selection at Wing-Wall Abutments, 991
Seepage Effects on Dune Dimensions, 922

Bench marks

Benchmarking of Project Management Office Establishment: Extracting Best Practices, 1191
Comparable Performance Measurement System for Construction Companies, 1195
Management of Construction Firm Performance Using Benchmarking, 1182

Bending

Behavior and Design of Seam-Welded Stainless Steel Circular Hollow Section Flexural Members, 1606
Biaxial Bending and Torsion of Steel Equal Angle Section Beams, 1438

Bridge Pile Bent Number of Pile and X-Bracing System: Impact on Pushover Capacity as Scour Increases, 1906

Combined Axial and Bending Stiffness in Interval Finite-Element Methods, 1597

Damage Mechanisms of a Reinforced Concrete Rock-Shed Slab Impacted by Blocks, 1571

Durability of Pultruded E-Glass/Vinylester under Combined Hygrothermal Exposure and Sustained Bending, 1287

Effects of Extreme Scour and Soil Subgrade Modulus on Bridge Pile Bent Buckling, 1907

Experimental Investigation of Cold-Formed High-Strength Stainless Steel Tubular Members Subjected to Combined Bending and Web Crippling, 1531

Global Constitutive Model for Reinforced Concrete Plates, 476

Lightweight Panels of Steel Fiber-Reinforced Self-Compacting Concrete, 1242

Screening Tool to Assess Adequacy of Bridge Pile Bents during Extreme Flood/Scour Events, 1908

Short- and Long-Term Deflections in Reinforced, Prestressed, and Composite Concrete Beams, 1478

Simplified Moment Redistribution of Hybrid HPS 485W Bridge Girders in Negative Bending, 160

Static Strength of Thick-Walled CHS X-Joints Subjected to Brace Moment Loadings, 1557

Testing and Analysis of Aluconcrete Beams, 1270

Bending moments

Closed-Form Solutions for Flexural Response of Fiber-Reinforced Concrete Beams, 540

Bends, hydraulic

Reduction of Bend Scour by an Outer Bank Footing: Footing Design and Bed Topography, 885

Benefit cost ratios

Benefit-Cost Analysis of FEMA Hazard Mitigation Grants, 1868

Cost-Benefit Importance Vectors for Performance-Based Structural Engineering, 1519

Costs and Benefits of Home-Based Telecommuting: A Monte Carlo Simulation Model Incorporating Telecommuter, Employer, and Public Sector Perspectives, 1077

Highway User Travel Time Evaluation, 1713

Integrated Cost-Benefit Analysis with Environmental Factors for a Transportation Project: Case of Pinglin Interchange in Taiwan, 1736

Using Bargaining-Game Theory for Negotiating Concession Period for BOT-Type Contract, 359

Benefits

Influences on Innovation Benefits during Implementation: Client's Perspective, 351

Willingness-to-Pay and Preference Heterogeneity for Rural Bus Attributes, 1646

Bentonite

Inclusion of Some Aspects of Chemical Behavior of Unsaturated Soil in Thermo/Hydro/Chemical/Mechanical Models. I: Model Development, 484

Best Management Practice

Benchmarking of Project Management Office Establishment: Extracting Best Practices, 1191

Best Practices for Long-Lasting Low-Volume Pavements, 1106

Evaluation of Four Permeable Pavement Sites in Eastern North Carolina for Runoff Reduction and Water Quality Impacts, 1177

Field Survey of Permeable Pavement Surface Infiltration Rates, 1138

Project Manager's Decision Aid for a Radical Project Cycle Reduction, 365

Quality Management System for Design Consultants: Development and Application on Projects in the Middle East, 1189

Temperature Effects on the Infiltration Rate through an Infiltration Basin BMP, 1178

Water Quality and Ecosystem Modeling of Tidal Wetlands, 674

Biaxial loads

Development and Validation of a Generalized Biaxial Hysteresis Model, 464

Development of Multidirectional Structural Testing System Applicable to Pseudodynamic Test, 1492

Bicycles

Rethinking Geometric Design Standards for Bike Paths, 1699

Bids

Contractor's Opportunistic Bidding Behavior and Equilibrium Price Level in the Construction Market, 362

Gates' Bidding Model, 411

How Reliable Is the Total Cost or Modified Total Cost Method?, 1400

Implementation of Quality Criteria in Tendering and Regulating Infrastructure Management Contracts, 376

Owner Procured Preliminary Shop Drawings, 1900

Review of Unbalanced Bidding Models in Construction, 377

Bifurcations

Automatic Two-Stage Calculation of Bifurcation Path of Perfect Shallow Reticulated Domes, 1449

Discontinuous Bifurcation Analysis of a Coupled Rate-Dependent Damage and Plasticity Model for Impact Responses, 544

Influence of Nonassociativity on Localization and Failure in Geomechanics Based on Gradient Elastoplasticity, 21

Nonlinear Dynamical Model for Hysteresis Based on Nonconvex Potential Energy, 499

Binders, materials

HP-GPC Characterization of Rejuvenated Aged CRM Binders, 1269

Micromechanical Modeling of the Viscoelastic Behavior of Asphalt Mixtures Using the Discrete-Element Method, 27

Rutting Resistance of Rubberized Asphalt Concrete Pavements Containing Reclaimed Asphalt Pavement Mixtures, 1264

Biodegradation

Biodegradation of PCE in a Hybrid Membrane Aerated Biofilm Reactor, 590

Bioremediation of Hazardous Wastes — A Review, 10

Chaotic Advection and Enhanced Groundwater Remediation, 1215

Liquid Sodium Ferrate and Fenton's Reagent for Treatment of Mature Landfill Leachate, 710

Nitric Oxide Emission and Soil Microbial Activities in Toluene Contaminated Soil, 618

Pretreatment of Highly Polluted Pharmaceutical Waste Broth by Wet Air Oxidation, 598

Using the Kinetics of Biological Flocculation and the Limiting Flux Theory for the Preliminary Design of Activated Sludge Systems. II: Experimental Verification, 601

Biofilm

2,4,6 Tri-Chlorophenol Containing Wastewater Treatment Using a Hybrid-Loop Bioreactor System, 630

Biodegradation of PCE in a Hybrid Membrane Aerated Biofilm Reactor, 590

Clogging of Gravel Drainage Layers Permeated with Landfill Leachate, 816

Comparison of Ion-Selective and Carbon Fiber Mercury Film Microelectrodes for Cadmium Measurement, 662

Effect of Biofilm Formation on Roughness Coefficient and Solids Deposition in Small-Diameter PVC Sewer Pipes, 633

Evaluation for Biological Reduction of Nitrate and Perchlorate in Brine Water Using the Hydrogen-Based Membrane Biofilm Reactor, 607

Horizontal-Flow Biofilm System with Step Feed for Nitrogen Removal, 657

Microbial Characteristics of Water Distribution: Compiled Investigations in a German Drinking Water Distribution System, 1879

Single-Submerged Attached Growth Bioreactor for Simultaneous Removal of Organics and Nitrogen, 612

Biographies

John A. Roebling: A Bicentennial Celebration of His Birth 1806-2006, 1988

Biological treatment

2,4,6 Tri-Chlorophenol Containing Wastewater Treatment Using a Hybrid-Loop Bioreactor System, 630

Degradation of Microcystin-LR through Biological Sand Filters, 1892

Enhanced Biological Phosphorus Removal Performance and Microbial Population Changes at High Organic Loading Rates, 701

Evaluation for Biological Reduction of Nitrate and Perchlorate in Brine Water Using the Hydrogen-Based Membrane Biofilm Reactor, 607

Evolutionary Multivariate Dynamic Process Model Induction for a Biological Nutrient Removal Process, 718

Field Demonstration of Biologically Active Zone Enhancement Using Acetate as a Sole Carbon Source for In Situ Reductive Transformation of RDX in Groundwater, 1880

Horizontal-Flow Biofilm System with Step Feed for Nitrogen Removal, 657

Hybrid-Hollow-Fiber Membrane Bioreactor for Cometabolic Transformation of 4-Chlorophenol in the Presence of Phenol, 638

Kinetics of Phosphorus Release and Uptake in a Membrane-Assisted Biological Phosphorus Removal Process, 695

Phosphorus Co-Precipitation in the Biological Treatment of Slaughterhouse Wastewater in a Sequencing Batch Reactor, 14

Retarded Transport and Accumulation of Soluble Microbial Products in a Membrane Bioreactor, 592

Robust Optimal Design of Activated Sludge Bioreactors, 593

Tracer Studies in a Laboratory Beach Subjected to Waves, 675

Using the Kinetics of Biological Flocculation and the Limiting Flux Theory for the Preliminary Design of Activated Sludge Systems. I: Model Development, 600

Biomass

Eutrophication Model for the Patuxent Estuary: Advances in Predictive Capabilities, 697

Renewable Energy Generation by Full-Scale Biomass Gasification System Using Agricultural and Forestal Residues, 1890

Bitumen

Characterization of Aggregate Surface Energy Using the Universal Sorption Device, 1283

Destruction and Recovery of Internal Structure in Polymer-Modified Asphalts, 1234

Three-Dimensional Linear Behaviorof Bituminous Materials: Experiments and Modeling, 29

Blast loads

Effects of Foam Claddings for Structure Protection against Blast Loads, 453

Evolutionary Algorithm for Performance-Based Shear Wall Placement in Buildings Subjected to Multiple Load Types, 1544

Reliability of Concrete Masonry Unit Walls Subjected to Explosive Loads, 1522

Use of Composites to Resist Blast, 265

Blasting

Behavior of Ultrahigh-Strength Prestressed Concrete Panels Subjected to Blast Loading, 1587

Techniques for Numerical Simulations of Concrete Slabs for Demolishing by Blasting, 501

Use of Composites to Resist Blast, 265

Blocks

Enhancing Bond Strength and Characteristics of Soil-Cement Block Masonry, 1226

Interlock Mechanism of Concrete Block Pavements, 1674

Bolts

Experimental Study on Prefabricated Concrete Bridge Girder-to-Girder Intermittent Bolted Connections System, 173

Fatigue Resistance of HPS-485W (70 W) Continuous Plate with Punched Holes, 123

Three-Dimensional Nonlinear Finite-Element Analysis of Gasketed Flange Joint under Combined Internal Pressure and Variable Temperatures, 472

Bonding

Analysis of Compatibility between Repair Material and Substrate Concrete Using Simple Beam with Third Point Loading, 1332

Analysis of Scaling and Instability in FRP-Concrete Shear Debonding for Beam-Strengthening Applications, 455

Analytical Method for Pullout of Anchor from Anchor — Mortar — Concrete Anchorage System due to Shear Failure of Mortar, 583

Analytical Modeling of the Pre- and Postyield Behavior of Bond in Reinforced Concrete, 1565

Bond Behavior of CFRP Bars in Simply Supported Reinforced Concrete Beam with Hanging Region, 219

Bond Durability of Glass Fiber-Reinforced Polymer Bars Embedded in Concrete Beams, 231
Bond Performances of FRP Rebars-Reinforced Concrete, 1231
Bond Strength of Near-Surface Mounted FRP Strip-to-Concrete Joints, 245
Bond Stress — Slip Relationship between FRP Sheet and Concrete under Cyclic Load, 247
Bonding Characteristics of Fiber-Reinforced Polymer Sheet-Concrete Interfaces under Dowel Load, 220
Case Study-Based Challenges of Quality Concrete Finishing for Architecturally Complex Structures, 340
Characterization of Aggregate Surface Energy Using the Universal Sorption Device, 1283
Concrete Cracking in Tension Members and Application to Deck Slabs of Bridges, 180
Constitutive Model for Time-Dependent Behavior of FRP – Concrete Interface, 253
Damage Approach for the Prediction of Debonding Failure on Concrete Elements Strengthened with FRP, 244
Damping and Viscoelastic Dynamic Response of RC Flexural Members Strengthened with Adhesively Bonded Composite Materials, 577
Development and Laboratory Analysis of Silicone Foam Sealant for Bridge Expansion Joints, 158
Effect of Concrete Composition on FRP/Concrete Bond Capacity, 266
Effect of Steel Fibers on Bond Performance of Steel Bars in NSC and HSC under Load Reversals, 1310
Enhancing Bond Strength and Characteristics of Soil-Cement Block Masonry, 1226
ESPI Measurement of Bond-Slip Relationships of FRP-Concrete Interface, 221
Fiber-Element Model for Slender HSS Columns Retrofitted with Bonded High-Modulus Composites, 1439
Flexural and Interfacial Behavior of FRP-Strengthened Reinforced Concrete Beams, 268
Generic Debonding Resistance of EB and NSM Plate-to-Concrete Joints, 212
High-Bond Bars in NSC and HPC: Study on Size Effect and on the Local Bond Stress-Slip Law, 1453
Interface Failure Mechanics of Elastically (Advanced Composite) Reinforced Steel Members, 1497
Interfacial Behavior and Debonding Failures in FRP-Strengthened Concrete Slabs, 267
Intermediate Crack Debonding in FRP-Strengthened RC Beams: FE Analysis and Strength Model, 222
Load-Displacement of Masonry Panels with Unbonded and Intermittently Bonded FRP. I: Analytical Model, 207
Load-Displacement of Masonry Panels with Unbonded and Intermittently Bonded FRP. II: Analytical Study, 208
Low Temperature Binder-Aggregate Adhesion and Mechanistic Characteristics of Polymer Modified Asphalt Mixtures, 1255
Modeling Debonding Failure in FRP Flexurally Strengthened RC Members Using a Local Deformation Model, 224
Nonlinear Characteristics of Damaged Reinforced Concrete Beam from Hilbert-Huang Transform, 1548
Optimum Soil Grading for the Soil-Cement Blocks, 1223
Prediction of Interfacial Bond Failure of FRP — Concrete Surface, 248
Realistic Bond Strength of FRP Rebars in NSC from Beam Specimens, 77
Realistic Models for Local Bond Stress-Slip of Reinforced Concrete under Repeated Loading, 1452
Reference-Free NDT Technique for Debonding Detection in CFRP-Strengthened RC Structures, 1536
Shear Bonding and Thermal Properties of Particle-Filled Polymer Grout for Pipe-in-Pipe Application, 1277
Study of Intermediate Crack Debonding in Adhesively Plated Beams, 223
Tensile Behavior of Fabric Cemente-Based Composites: Pultruded and Cast, 1247
Thermal Compatibility and Bond Strength of FRP Reinforcement in Prestressed Concrete Applications, 251
Tilting Analysis of Rectangular Elastic Layers Bonded between Rigid Plates, 550

Bored piles

Centrifuge Modeling of Large-Diameter Bored Pile Groups with Defects, 821

Boundaries

Quantitative Evaluation of the Effects of Hydrogeological Boundary and Initial Conditions on Slug Tests, 1876

Boundary element method

Current Effects on Nonlinear Wave-Body Interactions by a 2D Fully Nonlinear Numerical Wave Tank, 1812
Elastodynamic Potential Method for Transversely Isotropic Solid, 562
Method of Adaptive-Gradient Elements for Computational Mechanics, 458
New Fast Convolution Algorithm in Boundary-Element Methods for Two- and Three-Dimensional Linear Soil Consolidation Analysis, 38
Subelement Division Scheme in a Numerica Wave Tank That Uses Higher-Order Boundary Element Method, 1820

Boundary layer flow

Double-Averaging Concept for Rough-Bed Open-Channel and Overland Flows: Theoretical Background, 952
Double-Averaging Concept for Rough-Bed Open-Channel and Overland Flows: Applications, 953

Boundary layers

Spatially Averaged Turbulent Flow over Square Ribs, 469

Boundary shear

Analytic Stage-Discharge Formulas for Flow in Straight Prismatic Channels, 976

Box columns

Unified Approach for Analysis of Box-Section Members under Combined Actions, 164

Box girders

Design Optimization of Composite Steel Box Girder in Flexure, 1911
Unified Approach for Analysis of Box-Section Members under Combined Actions, 164

Bracing

Efficient Energy Dissipating Steel-Braced Frame to Resist Seismic Loads, 1525

Experimental Evaluation of a Large-Scale Buckling-Restrained Braced Frame, 1550

Seismic Assessment of Concentrically Braced Steel Frames with Shape Memory Alloy Braces, 1514

Seismic Behavior of HSS Bracing Members According to Width-Thickness Ratio under Symmetric Cyclic Loading, 1457

Seismic Response and Performance of Buckling-Restrained Braced Frames, 1549

Static Strength of Thick-Walled CHS X-Joints Subjected to Brace Moment Loadings, 1557

Performance of Wvaelet Transform and Empirical Mode Decomposition in Extracting Signals Embedded in Noise, 532
Trivariate Flood Frequency Analysis Using the Gumbel — Hougaard Copula, 1050
Uniform Shear Buildings under the Effect of Gravity Loads, 454

Frequency response
Improving the Performance of Structural Damage Detection Methods Using Advanced Genetic Algorithms, 1474
Structural Health Monitoring and Damage Assessment Using Frequency Response Correlation Criteria, 545

Fresh water
Semiempirical Model for Initial Displacement of Salt Water Wedge in a Bar-Blocked Estuary, 1825

Friction
Analysis of the Friction Term in the One-Dimensional Shallow-Water Model, 970
Application of Frictional Contact in Geotechnical Engineering, 32
Effect of Friction Fatigue on Pile Capacity in Dense Sand, 727
Energy Approach to Earthquake-Induced Slope Failures and Its Implications, 800
Mean Profile Depth of Pavement Surface Macrotexture Using Photometric Stereo Techniques, 1688
Numerical Sensitivity Study of Unsteady Friction in Simple Systems with External Flows, 940
Probabilistic Assessment of Stress Normalization for CPT Data, 805
Relationship between Hazen — William and Colebrook — White Roughness Values, 992

Friction resistance
Implications of Design Assumptions on Capacity Estimates and Demand Predictions of Multispan Curved Bridges, 187

Frost
Seasonal Frost Effects on the Soil — Foundation — Structure Interaction System, 204

Frozen soils
Finite-Element Analysis of Helical Piers in Frozen Ground, 203
Total Coliform Survival Characteristics in Frozen Soils, 715

Fuel consumption
Estimating the Effects of Traffic Congestion on Fuel Consumption and Vehicle Emissions Based on Acceleration Noise, 1650

Fuels
Biohydrogen Production by Mesophilic Anaerobic Fermentation of Glucose in the Presence of Linoleic Acid, 720
Chemical-Enhanced Washing for Remediation of Soils Contaminated with Marine Diesel Fuel in the Presence/Absence of Pb, 655
Environmental Implications of Construction Site Energy Use and Electricity Generation, 410
Mixing Autoshredder Residue and Waste Grease to Form Derived Fuel Rod, 1874

Full-scale tests
Cast Modular Panel Zone Node for Steel Special Moment Frames. II: Experimental Verification and System Evaluation, 1569
Determination of Composite Slab Strength Using a New Elemental Test Method, 1556
Development of Residual Forces in Long Driven Piles in Weathered Soils, 834
Full-Scale Field Testing of Colloidal Silica Grouting for Mitigation of Liquefaction Risk, 739
Full-Scale Test of Composite Frame under Large Cyclic Loading, 1460
Performance of Shear Walls with Diagonal or Transverse Lumber Sheathing, 1610
Shear Behavior of Corrugated Web Bridge Girders, 1
Structural Identification of a Nonproportionally Damped System and its Application to a Full-Scale Suspension Bridge, 7
Structurally Effective Static Wind Loads for Roof Panels, 1515
Testing of a Full-Scale Unreinforced Masonry Building Following Seismic Strengthening, 1551
Tests of RC Deck Girders with 1950s Vintage Details, 178
Use of Nondestructive Test Deflection Data for Predicting Airport Pavement Performance, 1683

Funding allocations
Fund Allocation for Transportation Network Recovery Following Natural Disasters, 1727

Furrow irrigation
Explicit Infiltration Function for Furrows, 1147
Physically Based Coupled Model for Simulating 1D Surface — 2D Subsurface Flow and Plant Water Uptake in Irrigation Furrows. I: Model Development, 1173
Physically Based Coupled Model for Simulating 1D Surface — 2D Subsurface Flow and Plant Water Uptake in Irrigation Furrows. II: Model Test and Evaluation, 1174

Fuzzy sets
Adaptive Network — Fuzzy Inferencing to Estimate Concrete Strength Using Mix Design, 1273
Adaptive Neurofuzzy Computing Technique for Evapotranspiration Estimation, 1154
Analysis of Nighttime Driver Behavior and Pavement Marking Effects Using Fuzzy Inference System, 290
Application of Fuzzy Logic to Estimate Flow of Methane for Energy Generation at a Sanitary Landfill, 447
Application of Fuzzy Sets for Remaining Life Assessment of Corrosion Affected Reinforced Concrete Bridge Girders, 1354
Cost and Land Functions for Wastewater Treatment Projects: Typical Simple Linear Regression versus Fuzzy Linear Regression, 659

Dynamic Prediction of Project Success Using Artificial Intelligence, 352
Evaluation of Input Variables in Adaptive-Network-Based Fuzzy Inference System Modeling for an Anaerobic Wastewater Treatment Plant under Unsteady State, 680
Fuzzy Analytical Hierarchy Process Risk Assessment Approach for Joint Venture Construction Projects in China, 402
Fuzzy Approach to Prequalifying Construction Contractors, 322
Fuzzy Multiobjective Decision-Making Approach for Groundwater Resources Management, 1027
Fuzzy Numbers in Cost Range Estimating, 353
Fuzzy Optimization Model for Earthwork Allocations with Imprecise Parameters, 337
Groundwater Flow and Contaminant Transport Simulation with Imprecise Parameters, 1116
Hybrid Soft Computing Approach for Mining of Complex Construction Databases, 313
Mechanical Properties and Fuzzy Modeling of High-Damping Rubber with Thermal Effects, 1257
Minimum Cost Irrigation Network Design Using Interactive Fuzzy Integer Programming, 1137
Optimization Model for Allocating Water in a River Basin during a Drought, 1175
PCM in Taiwan: A Diagnosis Knowledge-Base in PCM Plan/Design Phase, 282
Rule-Based Fuzzy System for Assessing Groundwater Vulnerability, 653
Stochastic Fuzzy Neural Network: Case Study of Optimal Reservoir Operation, 1794
Tank Simulation for the Optimization of Water Distribution Networks, 930
Water Quality Index: A Fuzzy River-Pollution Decision Support Expert System, 1755

Gamma function

Identifying Representative Parameters of IUH, 1179
Use of Gamma Distribution/Nash Model Further Simplified for Runoff Modeling, 1029

Gas

Biohydrogen Production by Mesophilic Anaerobic Fermentation of Glucose in the Presence of Linoleic Acid, 720
Electrochemical Desulfurization of Waste Gases in a Batch Reactor, 589
Wave-Induced Pore Pressures — Air/Gas Content, 1806

Gas flow

Application of Fuzzy Logic to Estimate Flow of Methane for Energy Generation at a Sanitary Landfill, 447
Operation and Performance of Horizontal Wells for Leachate Control in a Waste Landfill, 817

Gas pipelines

Stress Concentration Solution for a 2D Dent in an Internally Pressurized Cylinder, 527

Gasification

Renewable Energy Generation by Full-Scale Biomass Gasification System Using Agricultural and Forestal Residues, 1890

Gates

Dimensionless Approach for the Design of Flushing Gates in Sewer Channels, 961

Geodetic surveys

Critical Limitation in Use of τ Test for Gross Error Detection, 1620
Geodetic Determination of Radio Telescope Antenna Reference Point and Rotation Axis Parameters, 1619
Global Optimization Solution of Robust Estimation, 1629
GPS-Network Analysis with BLIMPBE: An Alternative to Least-Squares Adjustment for Better Bias Control, 1628
Influence of the Cutoff Angle and the Bearing in High-Precision GPS Vector Determination, 1625
Quasi-Accurate Detection of Outliers for Correlated Observations, 1630
Semianalytical Equations for Transforming Errors into a Local Geodetic Frame, 1626

Geographic information systems

Analysis of Spatial Scenarios Aiding Decision Making for Regional Irrigation Water-Demand Planning, 1163
Approximate Extraction of Spiralled Horizontal Curves from Satellite Imagery, 1618
Area-Based Models of Highway Growth, 1744
Comparisons of GPS-Derived Orthometric Heights Using Local Geometric Geoid Models, 1614
Deciding Alternative Land Use Options in a Watershed Using GIS, 1127
Derivation of a Distributed Unit Hydrograph Integrating GIS and Remote Sensing, 1070
Estimating the Hydrological Influence of Maryland State Dams Using GIS and the HEC-1 Model, 1075
GIS Approach of Delineation and Risk Assessment of Areas Affected by Arsenic Pollution in Drinking Water, 677
GIS-Based Engineering Management Service Functions: Taking GIS beyond Mapping for Muncipal Governments, 312
Highway Alignment Optimization Incorporating Bridges and Tunnels, 1647
Influence of the Cutoff Angle and the Bearing in High-Precision GPS Vector Determination, 1625
Infrastructure Management Information System Framework Requirements for Disasters, 281
Layout Design of Irrigation Networks in Highly Parcelled Territories Using Geographical Information System, 1176
Optimizing Rail Transit Routes with Genetic Algorithms and Geographic Information System, 1735
Quantifying Rainfall and Flooding Impacts on Groundwater Levels in Irrigation Areas: GIS Approach, 1153
Rule-Based Fuzzy System for Assessing Groundwater Vulnerability, 653
Sharing Water Resources Data in the Binational Rio Grande/Bravo Basin, 1786
Utility of LANDSAT-Derived Land Use Data for Estimating Storm-Water Pollutant Loads in an Urbanizing Area, 614

Geogrids

Laboratory Characterization of Reinforced Crushed Limestone under Monotonic and Cyclic Loading, 1300
Performance of a Geogrid-Reinforced and Pile-Supported Highway Embankment over Soft Clay: Case Study, 856

Pullout Resistance of Individual Longitudinal and Transverse Geogrid Ribs, 725

Geoid

Application of a Back-Propagation Artificial Neural Network to Regional Grid-Based Geoid Model Generation Using GPS and Leveling Data, 1624

Comparisons of GPS-Derived Orthometric Heights Using Local Geometric Geoid Models, 1614

Geomaterials

Evaluation of Newly Developed Aluminum, Lime, and Fly Ash Technology for Solidifaction/Stabilization of Mine Tailings, 1219

Extended Transformed Stress Space for Geomaterials and Its Application, 560

Geometric nonlinearity

Large-Displacement Analysis of Planar RC Structures, 1488

Response Gradients for Nonlinear Beam-Column Elements under Large Displacements, 1446

Rotational Spring Analogy for Buckling Analysis, 1503

Quality Management System for Design Consultants: Development and Application on Projects in the Middle East, 1189
Quasi-Accurate Detection of Outliers for Correlated Observations, 1630
Top Ten Qualities of Project Manager Heroes: An Interview with David B. Perini, 1849
Waste Containment Facilities: Guidance for Construction Quality Assurance and Construction Quality Control of Liner and Cover Systems, 2006

Quantitative analysis

CTAN for Risk Assessments Using Multilevel Stochastic Networks, 328
Engineering Analysis with Uncertainties and Complexities, Using Reasoning Approaches, 314

Quarries

Production of Briquettes from the Golden Horn Sediments under Thermal and Hydrothermal Conditions, 1281

Radar

Adjustment of Radar-Based Precipitation Estimates for Great Lakes Hydrologic Modeling, 1038
Detection of Common Defects in Concrete Bridge Decks Using Nondestructive Evaluation Techniques, 135
Effectiveness of Blank-Out Overhead Dynamic Advance Warning Signals at High-Speed Signalized Intersections, 1702
Failure Analysis of a Bridge Embankment with Cracked Approach Slabs and Leaking Sand, 1379
Induced-Partial Saturation for Liquefaction Mitigation: Experimental Investigation, 759

Radial flow

Clogging of Pervious Monolayers Subjected to Radial Flow, 17

Radiation

Safety Management of RF Radiation Sources in the United Arab Emirates, 1891

Radioactive materials

Aquatic Assessment of the Chernobyl Nuclear Accident and Its Remediation, 707
Capture of Airborne Particulate Using Surface Applied Emulsions: Potential for Postdetonation Dirty Bomb Cleanup, 620
Casing Influence in Reservoir Compaction Measurement by Radioactive Markers in the Northern Adriatic, Italy, 61

Radioactive wastes

Damage Evaluation with P-Wave Velocity Measurements during Uniaxial Compression Tests on Argillaceous Rocks, 59
Inclusion of Some Aspects of Chemical Behavior of Unsaturated Soil in Thermo/Hydro/Chemical/Mechanical Models. I: Model Development, 484
Inclusion of Some Aspects of Chemical Behavior of Unsaturated Soil in Thermo/Hydro/Chemical/Mechanical Models. II: Application and Transport of Soluble Salts in Compacted Bentonite, 485

Radiography

Dynamic Effects on Moisture Transport in Asphalt Concrete, 1685
Inspection of Quebec Street Bridge in Denver, Colorado: Destructive and Nondestructive Testing, 1360

Rail transportation

International Conference on Transportation Engineering 2007, 1986

Railroad engineering
Qinghai-Xizang Railroad Construction in Permafrost Regions, 201

Railroad grade crossings
Evaluation of Flexible Traffic Separators at Highway — Railroad Grade Crossings, 1684
Improved Transition Preemption Strategy for Signalized Intersections near At-Grade Railway Grade Crossing, 1689
Reducing Treatment Selection Bias for Estimating Treatment Effects Using Propensity Score Method, 1652

Railroad stations
Grand Inspiration, 1950

Railroad tracks
Cyclic Filtration Apparatus for Testing Subballast under Rail Track, 756
Field-Scale Assessment of Uncertainties in Drip Irrigation Lateral Parameters, 1170

Railroad trains
Studying Characteristics of Train-Induced Ground Vibrations Adjacent to an Elevated Railway by Field Experiments, 841

Rainfall
Application of Copulas to Modeling Temporal Sampling Errors in Satellite-Derived Rainfall Estimates, 1047
Case Study of Monthly Regional Rainfall Evaluation by Spatiotemporal Geostatistical Method, 1015
Derivation of a Distributed Unit Hydrograph Integrating GIS and Remote Sensing, 1070
Estimating Rain Derived Inflow and Infiltration for Rainfalls of Varying Characteristics, 880
Factors Controlling Instability of Homogeneous Soil Slopes under Rainfall, 861
Gumbel — Hougaard Copula for Trivariate Rainfall Frequency Analysis, 1048
Identifying Representative Parameters of IUH, 1179
Liquid Analog Model for Laboratory Simulation of Rainfall — Runoff Process, 1033
Ponding Analysis with Green-and-Ampt Infiltration, 1016
Radial Basis Function Modeling of Hourly Streamflow Hydrograph, 1017
Sizing of Rainwater Storage Units for Green Building Applications, 1026
Storm Event and Continuous Hydrologic Modeling for Comprehensive and Efficient Watershed Simulations, 1067

Rainfall duration
Dimensionless Rainfall Patterns for South Carolina, 1019

Rainfall frequency
IDF Curves Using the Frank Archimedean Copula, 1071
Wavelet Empirical Orthogonal Functions of Space-Time-Frequency Regimes and Predictability of Southern Africa Summer Rainfall, 1058

Random processes
Amplitude Variability in Simulated Incoherent Seismic Ground Motions, 531
Peak Response of a Nonlinear Beam, 543
Probability Density and Excursions of Structural Response to Imperfectly Periodic Excitation, 551

Rapid transit systems
Impacts of Bus Rapid Transit Lanes on Traffic and Commuter Mobility, 1728
Optimizing Rail Transit Routes with Genetic Algorithms and Geographic Information System, 1735

Ratings
Analytical Load Rating of an Open-Spandrel Arch Bridge: Case Study, 113
Comparative Probabilistic Initial Bridge Load Rating Model, 194

Rayleigh waves
Surface Wave Tests for Vibration Mitigation Studies, 843

Reactors
2,4,6 Tri-Chlorophenol Containing Wastewater Treatment Using a Hybrid-Loop Bioreactor System, 630
Activated Carbon Addition to a Submerged Anaerobic Membrane Bioreactor: Effect on Performance, Transmembrane Pressure, and Flux, 596
Arsenite Oxidation by *Alcaligenes Faecalis* Strain O1201 in a Continuous-Flow Bioreactor, 646
Biodegradation of PCE in a Hybrid Membrane Aerated Biofilm Reactor, 590
Electrochemical Desulfurization of Waste Gases in a Batch Reactor, 589
Evaluation for Biological Reduction of Nitrate and Perchlorate in Brine Water Using the Hydrogen-Based Membrane Biofilm Reactor, 607
Hybrid-Hollow-Fiber Membrane Bioreactor for Cometabolic Transformation of 4-Chlorophenol in the Presence of Phenol, 638
Photodechlorination of Aroclor 1254 in a Pilot-Scale Flow through Photoreactor, 667
Robust Optimal Design of Activated Sludge Bioreactors, 593
Shear Strength Parameters of Municipal Solid Waste with Leachate Recirculation, 768

Reaeration
Development of Refined BOD and DO Models for Highly Polluted Kali River in India, 689
Dissolved Oxygen Downstream of an Effluent Outfall in an Ice-Covered River: Natural and Artificial Aeration, 711

Recirculation
Layer Integrated Modeling of Three-Dimensional Recirculating Flows in Model Tidal Basins, 1833
Leachate Recirculation in Bioreactor Landfills Using Geocomposite Drainage Material, 737
Nitrogen Removal in Recirculating Sand Filter Systems with Upflow Anaerobic Components, 645

Reconnaissance
Evaluation of Augmented Reality for Rapid Assessment of Earthquake-Induced Building Damage, 309
Impact of Great December 26, 2004, Sumatra Earthquake and Tsunami on Structures in Port Blair, 1350

Reconstruction
Lake Street Lessons, 1926
Productivity Aspects of Urban Freeway Rehabilitation with Accelerated Construction, 405

State-of-Practice Technologies on Accelerated Urban Highway Rehabilitation: I-15 California Experience, 329

Recycling

Adsorption and Precoat Filtration Studies of Synthetic Dye Removal by Acid Mine Drainage Sludge, 665

Beneficial Reuse of FGD Material in the Construction of Low Permeability Liners: Impacts on Inorganic Water Quality Constituents, 652

Characterization of Chromite Ore Processing Residue, 1897

Creep Behavior of Recycled Plastic Lumber in Slope Stabilization Applications, 1222

Effects of Nano-SiO_2 on Tiles Manufactured with Clay and Incinerated Sewage Sludge Ash, 1303

Effects of Rejuvenating Agents on Superpave Mixtures Containing Reclaimed Asphalt Pavement, 1251

HP-GPC Characterization of Rejuvenated Aged CRM Binders, 1269

Immediate and Time-Dependent Compression of Tire Derived Aggregate, 747

Indirect Tension Relaxation Test to Evaluate the Effect of the Addition of RAP to HMA Mixes, 1233

Influence of Fly Ash as Cement Replacement on the Properties of Recycles Aggregate Concrete, 1293

Mixing Autoshredder Residue and Waste Grease to Form Derived Fuel Rod, 1874

Performance Monitoring of Embankments Containing Tire Chips: Case Study, 1359

Plastics Waste Processing: Comminution Size Distribution and Prediction, 619

Preliminary Constituent Proportioning for Central Plant Hotmix ASphalt Recycling, 1296

Rutting Resistance of Rubberized Asphalt Concrete Pavements Containing Reclaimed Asphalt Pavement Mixtures, 1264

Validation of New Mix Design Procedure for Cold In-Place Recycling with Foamed Asphalt, 1326

Variability and Scale-Dependency of Tire-Derived Aggregate, 1235

Reefs

Effect of a Shallow Water Obstruction on Long Wave Runup and Overland Flow Velocity, 1844

Reflection

Improving Traffic-Noise Model Insertion Loss Accuracy Based on Diffraction and Reflection Theories, 1670

Prediction of Road Marking Performance, 1677

Regional analysis

Evolution of Flood Frequency Analysis with *Bulletin 17*, 1037

Flood Regionalization: A Hybrid Geographic and Predictor-Variable Region-of-Influence Regression Method, 1065

Regional development

Consideration of Climate Variability and Change in Agricultural Water Resources Planning, 1772

Method for Comparative Performance Assessment and Evaluation of Consolidating Community Water Systems as a Regional Water System, 1103

Optimization and Assessment of Agricultural Water-Sharing Scenarios under Multiple Socioeconomic Objectives, 1771

Regression analysis

Compaction Characteristics of Pond Ash, 1248

Comparative Analysis of the Old MWHGL and the New NAPTF Data, 1641

Comparing Net Radiation Estimation Methods: CIMIS versus Penman — Monteith, 1140

Cost and Land Functions for Wastewater Treatment Projects: Typical Simple Linear Regression versus Fuzzy Linear Regression, 659

Developing Regression Models for Predicting Pan Evaporation from Climatic Data — A Comparison of Multiple Least-Squares, Principal Components, and Partial Least-Squares Approaches, 1162

Flood Regionalization: A Hybrid Geographic and Predictor-Variable Region-of-Influence Regression Method, 1065

Forecasting Residential Water Demand: Case Study, 1775

Impact of Left-Turn Phasing on Older and Younger Drivers at High-Speed Signalized Intersections, 1701

Predicting Profit Performance for Selecting Candidate International Construction Projects, 364

Productivity Study of Microtunneling Pipe Installation Using Simulation, 1100

Quantitative Methodology for Determination of Cost Contingency in International Projects, 1185

Risk Assessment for Bridge Maintenance Projects: Neural Networks versus Regression Techniques, 302

Short-Term Wind Power Forecast Based on ARX Models, 445

Stress-Strain Characteristics of Clay Brick Masonry under Uniaxial Compression, 1295

Valuing Simple Multiple-Exercise Real Options in Infrastructure Projects, 1085

Regression models

Bayesian Degradation Modeling in Accelerated Pavement Testing with Estimated Transformation Parameter for the Response, 1715

Cost and Land Functions for Wastewater Treatment Projects: Typical Simple Linear Regression versus Fuzzy Linear Regression, 659

Developing Regression Models for Predicting Pan Evaporation from Climatic Data — A Comparison of Multiple Least-Squares, Principal Components, and Partial Least-Squares Approaches, 1162

Evaluation and Modeling of Repeated Load Test Data of Asphalt Concrete for Mechanistic-Empirical Pavement Design, 1325

Modeling of Temperature—Frequency Correlation Using Combined Principal Component Analysis and Support Vector Regression Technique, 284

Modeling Pedestrian Walking Speeds on Sidewalks, 1740

Resilient Modulus Prediction Models Based on Analysis of LTPP Data for Subgrade Soils and Experimental Verification, 1694

Speed Changes in the Vicinity of Horizontal Curves on Two-Lane Rural Roads, 1663

Regulations

Effects of Regulation on Highway Pricing and Capacity Choice of a Build-Operate-Transfer Scheme, 324

Environmental Mandates for a Proposed Highway or Bridge Project When the Habitat of an Endangered Species and/or Historical Properties Are in the Vicinity, 1409

Implementation of Quality Criteria in Tendering and Regulating Infrastructure Management Contracts, 376

Integrating Mobility Management in Land Development Planning with Off-Street Parking Regulations, 1729

North Carolina — Virginia Conflict: The Lake Gaston Water Transfer, 1789

Rehabilitation

Analysis of Compatibility between Repair Material and Substrate Concrete Using Simple Beam with Third Point Loading, 1332

Analytical Method for Evaluating Ultimate Torque of FRP Strengthened Reinforced Concrete Beams, 243

Application of Structural Health Monitoring Techniques to Track Structural Changes in a Retrofitted Building Based on Ambient Vibration, 580

Assessment and Repair of Fire-Damaged High-Strength Concrete: Strength and Durability, 1262

Behavior of CFRP Strengthened Reinforced Concrete Beams in Corrosive Environment, 233

Behavior of FRP Strengthened Infill Walls under In-Plane Seismic Loading, 235

Bond Strength of Near-Surface Mounted FRP Strip-to-Concrete Joints, 245

Bridge Deck Rehabilitation Practices in North America, 1098

Case Study: Seismic Retrofitting of a Medieval Bell Tower with FRP, 236

Civil Works for Hydroelectric Facilities: Guidelines for Life Extension Upgrade, 1972

Comparison between Shape Memory Alloy Seismic Restrainers and Other Bridge Retrofit Devices, 186

Compression Tests of Circular Timber Column Confined with Carbon Fibers Using Inorganic Matrix, 1230

Decision-Support System for the Rehabilitation of Deteriorating Sewers, 1363

Effect of Concrete Composition on FRP/Concrete Bond Capacity, 266

Effect on Superstructure Stress of Replacing a Composite RC Bridge Deck with a GFRP Deck, 153

Effectiveness of Rehabilitation on Seismic Behavior of Masonry Piers, 1434

Effects of Existing Shear Damage on Externally Post-tensioned Repair of Bent Caps, 1594

Evaluation of Damage Potential for Pavements due to Overweight Truck Traffic, 1673

Evaluation of Optimum Rubblized Depth to Prevent Reflection Cracks, 1679

Evaluation of the Effectiveness of Strengthening Intervention by CFRP on MRWA Bridge No. 3014, 241

Evaluation of Trenchless Technology Methods for Municipal Infrastructure System, 1090

Expected Performance of Pavement Repair Works in a Global Network Optimization Model, 1088

Fatigue Behavior and Retrofit Investigation of Distortion-Induced Web Gap Cracking, 189

Fault Tree Analysis of Schoharie Creek Bridge Collapse, 1372

Fiber-Element Model for Slender HSS Columns Retrofitted with Bonded High-Modulus Composites, 1439

Flexural Behavior of Brittle RC Members Rehabilitated with Concrete Jacketing, 1566

Gathering Strength, 1946

Generic Debonding Resistance of EB and NSM Plate-to-Concrete Joints, 212

Hysteretic Behavior of Bridge Columns with FRP-Jacketed Lap Splices Designed for Moderate Ductility Enhancement, 262

Inspection of Quebec Street Bridge in Denver, Colorado: Destructive and Nondestructive Testing, 1360

Installed Geometry of Cast-in-Place Polymer Sewer Liners, 1355

Interfacial Behavior and Debonding Failures in FRP-Strengthened Concrete Slabs, 267

Modeling of Corroded FRP-Wrapped Reinforced Concrete Columns in Axial Compression, 261

Optimizing Maintenance Interventions for Deteriorating Structures Using Cost-Benefit Criteria, 1521

Pavement Reconstruction Scenarios Using Precast Concrete Pavement Panels, 1916

Performance Indicators and Multicriteria Decision Support for Sewer Asset Management, 1086

Performance-Based Seismic Retrofit Strategy for Existing Reinforced Concrete Frame Systems Using Fiber-Reinforced Polymer Composites, 227

Perpetuating a Pier, 1937

Productivity Aspects of Urban Freeway Rehabilitation with Accelerated Construction, 405

Rapid Replacement of Four GDOT Bridge Decks, 1904

Rehabilitation of Cracked Aluminum Connections with GFRP Composites for Fatigue Stresses, 237

Renovation of a Safety-Inspection Methodology for River Bridges, 1380

Restoration and Strengthening of Timber Structures: Principles, Criteria, and Examples, 1915

Seismic Behavior and Retrofit of Outrigger Knee Joints, 175

Seismic Rehabilitation of Existing Buildings, ASCE / SEI 41-06, 2000

Seismic Response of Interior RC Beam-Column Joints Upgraded with FRP Sheets. I: Experimental Study, 263

Seismic Response of Interior RC Beam-Column Joints Upgraded with FRP Sheets. II: Analysis and Parametric Study, 264

Sensitivity of Seismic Response and Fragility to Parameter Uncertainty, 1598

Static Cyclic Response of Masonry Walls Retrofitted with Fiber-Reinforced Polymers, 211

Strain-Based Confinement Model for FRP-Confined Concrete, 1510

Structural Evaluation and Construction of Fiber-Reinforced Polymer Composites Strengthening Systems for the Sauvie Island Bridge, 229

Structural Properties of Steels Subjected to Multiple Cycles of Damage Followed by Heating Repair, 1459

Study of Intermediate Crack Debonding in Adhesively Plated Beams, 223

Torsional Capacity of CFRP Strengthened Reinforced Concrete Beams, 213

Ultrasonic Pulse Velocity in Nondestructive Evaluation of Low Quality and Damaged Concrete and Masonry Construction, 1374

An Uplifting Experience, 1921

Reinforcement

Bond Behavior of CFRP Bars in Simply Supported Reinforced Concrete Beam with Hanging Region, 219

Concrete Delamination Caused by Steel Reinforcement Corrosion, 1278
Confinement of Damaged and Nondamaged Structural Concrete with FRP and TRC Sleeves, 257
Construction and Testing of an Innovative Concrete Bridge Deck Totally Reinforced with Glass FRP Bars: Val-Alain Bridge on Highway 20 East, 179
Design Expression for the In-Plane Shear Strength of Reinforced Concrete Masonry, 1499
Economic Evaluation of Reinforced Concrete Structures with Columns Reinforced with Prefabricated Cage System, 412
Effect of Moisture State on Mechanical Behavior and Microstructure of Pulp Fiber-Cement Mortars, 1290
Effect of Size on the Failure of Geometrically Similar Concrete Beams Strengthened in Shear with FRP Strips, 254
Effects of Continuity Plate and Transverse Reinforcement on Cyclic Behavior of SRC Moment Connections, 1440
Field Trial for Asphalt Pavements Reinforced with Geowynthetics and Behavior of Glass-Fiber Grids, 1377
Load-Displacement of Masonry Panels with Unbonded and Intermittently Bonded FRP. I: Analytical Model, 207
Load-Displacement of Masonry Panels with Unbonded and Intermittently Bonded FRP. II: Analytical Study, 208
Mechanical and Structural Characterization of New Carbon FRP Stirrups for Concrete Members, 240
Pullout Resistance of Individual Longitudinal and Transverse Geogrid Ribs, 725
Realistic Bond Strength of FRP Rebars in NSC from Beam Specimens, 77
Reinforced Stone Columns in Weak Deposits: Laboratory Model Study, 828
Structural Upgrading of Masonry Columns by Using Composite Reinforcements, 270
Thermal Compatibility and Bond Strength of FRP Reinforcement in Prestressed Concrete Applications, 251

Reliability

Approximate Reliability-Based Optimization Using a Three-Step Approach Based on Subset Simulation, 497
Deterioration of Strength of RC Beams due to Corrosion and Its Influence on Beam Reliability, 1559
Efficiency and Reliability of Ambiguity Resolution in Network-Based Real-Time Kinematic GPS, 1621
Efficient Spreadsheet Algorithm for First-Order Reliability Method, 585
Evaluation of 3D Steel Moment Frames under Earthquake Excitations. II: Reliability and Redundancy, 1476
Evaluation of Risk-Related Performance in Water Management for the Ganges Delta of Bangladesh, 1763
Factors Affecting Life-Cycle Cost Analysis of RC Structures in Chloride Contaminated Environments, 1089
Inclinometer Monitoring of the Castelrotto Landslide in Italy, 784
Numerical Approximations of Design Points in Reliability Analysis under Parametric Changes, 570
Projection Method for Validating Reliability Analysis of Soil Slopes, 793
Reliability Evaluation of Vehicle — Bridge Dynamic Interaction, 1537
Risk and Reliability Analysis: A Handbook for Civil and Environmental Engineers, 1999
Sensitivity of Seismic Response and Fragility to Parameter Uncertainty, 1598
Simultaneous Determination of Critical Slip Surface and Reliability Index for Slopes, 804
Uncertainty Analysis of Micropile Pullout Based upon Load Test Results, 815

Remedial action

Applying a One-Dimensional Mass Transport Model Using Groundwater Concentration Data, 634
Aquatic Assessment of the Chernobyl Nuclear Accident and Its Remediation, 707
Benefit-Cost Analysis of FEMA Hazard Mitigation Grants, 1868
Chaotic Advection and Enhanced Groundwater Remediation, 1215
Efficient Groundwater Remediation System Design Subject to Uncertainty Using Robust Optimization, 1770
Field Monitoring of a Permeable Reactive Barrier for Removal of Chlorinated Organics, 9
Kinetic Model for the Remediation of Soils Contaminated with Hydrocarbons Using Low-Temperature Oxidation, 1899
Performance Monitoring of Remediation Technologies for Soil and Groundwater Contamination: Review, 1886
Remediation of TCE-Contaminated Groundwater in a Sandy Aquifer Using Pulsed Air Sparging: Laboratory and Numerical Studies, 635
Remediation Technologies for Soils and Groundwater, 1998
Risk-Based Prioritization of Terrorist Threat Mitigation Measures on Bridges, 127
Surface Wave Tests for Vibration Mitigation Studies, 843

Remote sensing

Deciding Alternative Land Use Options in a Watershed Using GIS, 1127
Derivation of a Distributed Unit Hydrograph Integrating GIS and Remote Sensing, 1070
Effects of Urban Land Use on Surface Temperature in Berlin: Case Study, 1732
Estimating Daily Net Radiation over Vegetation Canopy through Remote Sensing and Climatic Data, 1145
Evaluation of an Experimental LiDAR for Surveying a Shallow, Braided, Sand-Bedded River, 949
Utility of LANDSAT-Derived Land Use Data for Estimating Storm-Water Pollutant Loads in an Urbanizing Area, 614

Renewable resources

Potential of Renewable Energies in Turkey, 433

Renovation

Renovating Loch Raven Dam, 1924
Station Transformation, 1947

Repeated loads

Advanced Crack Width Analysis of Reinforced Concrete Beams under Repeated Loads, 1470
Evaluation and Modeling of Repeated Load Test Data of Asphalt Concrete for Mechanistic-Empirical Pavement Design, 1325

Realistic Models for Local Bond Stress-Slip of Reinforced Concrete under Repeated Loading, 1452

Research

Addressing Expansive Soils, 1930

CEM Research for the Next 50 Years: Maximizing Economic, Environmental, and Societal Value of the Built Environment, 382

Concerns about Methodology Used in Real-World Experiments on Transport and Transport Safety, 1642

Construction Industry Institute, 386
